

Mesh Christmas Charm Bracelet

Step 1 - Take 3 lengths of 4mm mesh tube - approx 30cm each and slide all 3 through one of your hanger beads. (Image A)

IMAGE A

Step 2 - Now measure out a small amount of Seed beads or crystals - You need to be able to measure out the same amount of beads or crystals each time, so your bracelet has even sections. Either weigh them on scales or find the right size container that holds the correct amount of beads or crystal. Each section needs approx 25-30mm long of beads/crystal, so you can fill each Mesh tube and calculate the amount of beads/crystal by measurement.

IMAGE B

Step 3 - Fill each Mesh tube with your beads/crystals using bead scoop or small funnel. (Image B) Ensure the beads are completely down inside the tubes and then slide on another hanger bead, taking all 3 Mesh tubes through the hole.

Step 4 - Repeat Step 2, 3 more times, but on your last one instead of a hanger bead, take some thread and securely tie all 3 ends together, wrapping the thread around the ends. Continue to wrap the thread around to create a short end for your clasp. (Image C) Glue the end of your mesh into 1 end of your clasp with super glue. You will need to hold this in place for a few minutes to ensure the mesh is glued inside. (Image D)

Step 5 - Now go back to the other side of your bracelet and fill each Mesh tube with your beads/crystals. Then, as before, take some thread and securely tie all 3 ends together, wrapping the thread around the ends. Continue to wrap the thread around to create a short end for your clasp. Glue this end of your mesh into the other end of your clasp with super glue and leave to dry completely.

Step 6 - Attach your charms to each of the loops on the hanger beads with a jump ring. (Image E)
