

How To Fit a Calotte

Step 1. Take your length of Tigertail and attach a crimp bead as below.

Step 2. Now, take the Calotte and slid it onto the Tigertail, pulling the secured crimp inside the Calotte. Trim excess Tigertail close to the crimp.

Step 3. Using round nose pliers, curl the Calotte loop round, so the end is sitting just inside the Calotte. (Image A) Gently squeeze the 2 sides of the Calotte together, trapping the crimp and the end of the loop inside. (Image B)

Step 4. For the other end of your bracelet or necklace, thread on a calotte, then a crimp. Secure crimp inside calotte with your pliers.
