

Servicing, Repairs & Spares

www.rotaval.co.uk

Rota Val's range of rotary and diverter valves will give you many years of use, so protect your investment with regular maintenance which will extend the life of your valve even further (we have valves that are still in operation after 30 years).

Adopting a predictive, reliability-based culture to plant maintenance has proven benefits extending far beyond the maintenance budget. Higher efficiency, increased uptime and significantly reduced emergency breakdowns sounds great but finding time on your already strained resources is always going to be difficult.

Rota Val offer two types of service agreement.

- 1 Customers wanting peace of mind can take up our comprehensive service maintenance agreement. This covers preventative service maintenance visits alongside repairs during the agreement period. Frequency of visits will be matched to your requirements.
- 2 Customers not wishing to sign up to a regular agreement, can have an arrangement on a 'pay as you go' service. Our contractual customers will enjoy priority call outs over any 'pay as you go' customers

Customer Benefits

- 12 month warranty on all refurbished valves with continued Rota Val support.
- Reduce operating costs.
- Budget and manage your maintenance costs.
- Maximise production uptime and reliability.
- Rotary valves maintained by the manufacturer.
- Regular assessment to provide you with details on the latest developments.

- Peace of mind that ATEX certifications remains valid.

Call and ask about our FREE no obligation initial on-site assessment so you can keep your plant protected, by the experts, hassle free.
