

Connection

- The track accessories are provided with earth connection points on both sides.
- When offering the accessory to the track, verify which tab needs to be removed. (See left hand diagram).
- To remove the tab, grasp firmly with a pair of pliers and lever back. The tab should snap cleanly off. (See right hand diagram).
- Locate the accessory in the track and push home.
- Locate the product in the track with the connections in the slot.

Fitting Units

- Slide the tab down, and rotate the product 90 degrees to engage the connections in the track.
- Allow the tab to slide back up and ensure that it is located correctly in the track slot.
- Replace fuse or circuit breaker and switch on. Your light is now ready for use.

Fitting/replacing bulbs

- When changing a bulb, always switch off at the mains and allow the bulb to cool before handling. Dispose of used bulbs carefully. Do not exceed the wattage stated or use a different shape bulb from that indicated on the fitting.
- Use a soft cloth to handle bulbs, avoid directly touching the bulbs as this will shorten their life.
- Remove bulb by turning a quarter turn anticlockwise and pulling out.
- Push the bulb gently into the lampholder and twist a quarter turn clockwise to engage pins.

We recommend cleaning with a soft dry cloth.
Do not use solvents or abrasive cleaners as these could damage the finish.

Recycling advice

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

Safety information

For your safety, always switch off the supply before changing lightbulbs, or cleaning.

Instruction leaflet

Bullet Triple Track Kit

48024, 48025

saxby
lighting

Thank you for purchasing this light fitting. Please read the instructions carefully before use to ensure safe and satisfactory operation of this product. Please retain these instructions for future reference.

Warning

This is a Class 1 product and must be earthed.

Please read these instructions carefully before commencing any work.

This unit must be fitted by a competent and qualified electrician.

Install in accordance with IEE Wiring regulations and current Building Regulations.

To prevent electrocution switch off at mains supply before installing or maintaining this fitting. Ensure other persons cannot restore the electrical supply without your knowledge.

This light fitting should be connected to a fused circuit.

If replacing an existing fitting, make a careful note of the connections.

Always use the correct type and wattage bulb. Exceeding the bulb wattage will damage the product.

When changing a bulb, always switch off at the mains and allow the old bulb to cool down before handling. Dispose of used bulbs carefully and responsibly.

This product is suitable for dimming when used in conjunction with a dimmable lamp. Please ensure compatibility of dimming abilities with the lamp manufacture prior to use.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.

Specification

Voltage: 240V 50Hz a.c.
Lamp: 3 x Max. 50W GU10 Halogen
IP rating: 20

Layout

This track system can be extended to a variety of different configurations using accessories such as left bends, right bends, T junctions, X junctions and flexible joints.

Spotlights give a concentrated beam of light and must not be positioned any closer than 0.5M (50cm) to the illuminated surface.

Installation

1. Plan the track layout and decide accessories needed before fixing anything to the ceiling.
2. The maximum power per run of track is 1kW (1000W).
3. Ensure the ceiling is capable of holding the weight of the track and products. Take care to avoid damaging any concealed wiring and pipes. The correct fixings should be used for brick, cavity walls or plasterboard.
4. Mark the first hole position and fit the screw in position as shown.
5. Feed the screw through the keyhole slot, and slide into position. Mark the position of the second hole.
6. Locate the track and fit the second screw into position.
7. If fitting accessories, remove the end cap, and push them firmly home. Fit extra lengths of track as required.

Wiring

8. Undo the screw and remove the cover from the live end. Push out the desired cable access point.
9. Identify the correct cable from the supply and pull through
10. Connect the supply wires to the terminal block, opposite the corresponding wires from the fitting. The central connector can also be wired in this way. .
11. Refit the cover onto the live end taking care not to trap the cable.

Check that....

You have correctly identified the wires.
The connections are tight.
No loose strands have been left out of the connection block.
