

## Spray Mop Kit

### Kit Includes:

1x  
Spray Mop

1x  
Microfiber  
Pad

1x  
Cleaner Refill

## Everyday Maintenance

Arboritec Cleaner is a neutral cleaning product specially formulated in Sweden for oiled and lacquered wooden floors. You can also use this product on floors made of PVC, linoleum, vinyl, laminate and washable surfaces such as stone, tiles, glass, porcelain etc.

## Application

Before using Spray Mop Kit remove all loose particles which might scratch the surface by vacuuming or sweeping the floor, and assemble the Mop as per the instructions in the box. The Cleaner Spray Refill is pre-diluted, so there is no need to add anything to it. Simply remove the empty Spray Mop cartridge, pour in the cleaner and reattach it to the Spray Mop. Using the trigger, spray the Cleaner directly onto the floor and disperse it using the microfibre pad. Remove the pad regularly to rinse it in clear water, then just wring it out and reattach it to the mop head.

After cleaning is completed the microfibre mop pad can be removed and washed by hand or in a washing machine at 40°C. If washed by machine do not use fabric softener. Store the Spray Mop upright.

## Maintenance Products

In partnership with: 

## What's included?

### Lacquered Floor Kit

1x  
1L Cleaner  
Concentrate

#### Cleaner Concentrate

- Neutral cleaning product for lacquered or oiled wooden floors, laminate, PVC, linoleum and vinyl.
- This product contains no organic solvents or pigments and is environmentally friendly.

1x  
1L Refresher

#### Refresher

- Modern maintenance for lacquered wood floor surfaces, laminate, vinyl, PVC or linoleum.
- Dissolves itself with each new application to avoid product build up.
- Reduces visual signs of aging & wear.
- Recommended maintenance after every 5th cleaning with Cleaner.

### Oiled Floor Kit

1x  
1L Cleaner  
Concentrate

#### Cleaner Concentrate

- Neutral cleaning product for lacquered or oiled wooden floors, laminate, PVC, linoleum and vinyl.
- This product contains no organic solvents or pigments and is environmentally friendly

1x  
1L Oil  
Refresher  
Concentrate

#### Oil Refresher Concentrate

- Saponified pine wood oil to refresh the surface of oiled floors
- Makes floors more resistant to wear and prolongs the intervals between re-oiling renovation
- Reduces visual signs of aging and wear
- Recommended maintenance after every 5th clean with Cleaner.

## Lacquered Floor Instructions

### Cleaning

Before cleaning your lacquered floor, remove all loose particles which might scratch the surface by vacuuming or sweeping. Arboritec Cleaner should be diluted as per the instructions below and applied using a Spray Mop or a dampened household mop. Whilst mopping, rinse the Spray Mop pad or household mop regularly in clear water to remove collected dirt. Rinsing the floor after cleaning is not necessary.

#### IMPORTANT

**Never pour water directly onto wood floors, instead use a damp cloth or floor mop and remove excess water immediately.**

#### Dilution for cleaning Lacquered Floors

**Lightly soiled lacquered floors: 1:100;**  
10ml Cleaner Concentrate / 1L water (max 30°C)

**Heavily soiled lacquered floors: 1:20;**  
50ml Cleaner Concentrate / 1L water (max 30°C)

### Maintenance for Lacquered Floors

To keep your lacquered floor in perfect condition and prevent it from wear effects it should be maintained with Refresher after every 5th time using the Cleaner.

Pour Refresher into the Spray Mop refill cartridge or Squirt Refresher directly onto the floor from the bottle. Disperse the Refresher with a clean, damp mop or lint-free cloth.

**Please Note:** Do not dilute Refresher. Let it dry for about 1 hour before use.

\*Floors which previously have been treated with polish or wax have to be deep cleaned before using Refresher. If streaks appear it is likely that the floor has been treated with either polish or wax. In this case the polish needs to be removed with a specialised polish remover.

## Oiled Floor Instructions

### Cleaning

Before cleaning your oiled floor, remove all loose particles which might scratch the surface by vacuuming or sweeping. Arboritec Cleaner should be diluted as per the instructions below and applied using a Spray Mop or a dampened household mop. Whilst mopping, rinse the Spray Mop pad or household mop regularly in clear water to remove collected dirt. Rinsing the floor after cleaning is not necessary.

#### IMPORTANT

**Never pour water directly onto wood floors, instead use a damp cloth or floor mop and remove excess water immediately.**

#### Dilution for cleaning Oiled Floors

**Oiled floors: 1:200; 5ml Cleaner Concentrate / 1l water (max 20°C)**

It is **essential** on an oiled floor that the water not be too hot or the high dosage too high as this may risk lifting oil out of the floor.

### Maintenance for Oiled Floors

To keep your oiled floor in great condition and prevent it from wear effects it should be maintained with Oil Refresher instead of Cleaner every 5th clean.

Dilute Arboritec Oil Refresher as per the instructions below. Using a dampened Spray mop, or a normal damp mop, disperse the Oil Refresher across the floor. Do not rinse the floor with water afterwards. After treating an oiled floor with Oil Refresher the surface may appear matt. It can easily be polished up with a dry cotton cloth when it has dried.

#### Dilution for maintaining Oiled Floors

**1:20; 50ml Oil Refresher/1L cold water (max 20°C).**

It is essential on an oiled floor that the water not be too hot as this may risk lifting oil out of the floor.
