Product Change Notification

Notification Number: PCN-26001.

Notification date: 10-03-2026

Implementation date: 01-04-2026

Dear customer,

This document is to inform you of an upcoming change regarding one of our products.

CHANGE DESCRIPTION: REPLACEMENT OF EXISTING PRODUCT WITH NEW PRODUCT.

Product(s) involved: Ultraviolet Lamp Unit Mains Powered.

Current part code: OUV4000

Replacement Description: Ultraviolet LED Lamp Unit Mains Powered.

Replacement part code: OUV4001

Reason for change: The original product incorporated the old technology of using a fluorescent glass tube to produce the UV light. This design has now been superseded with the much safer and reliable solid-state LED technology. Therefore in order to keep our Ultraviolet Lamp Unit up to date with this latest technology we have replaced the older OUV4000 product with the OUV4001 LED product.

Additional Information: Following the above implementation date the IPC Irwin website 'Ultraviolet Lamp Unit Mains Powered' page will be updated to show the details of the new 'Ultraviolet LED Lamp Unit Mains Powered' product. Along with this the User Instructions will also be updated accordingly.

Photographic Details: Below are photographs showing original Ultraviolet Lamp Unit Mains Powered alongside the new LED unit.
