

Measuring Guide

Before ordering, **we recommend you measure your dog to get the best fitting Dogrobe.** If measuring up isn't an option, you could opt for the breed example shown.

Finding the right size of Dogrobe couldn't be easier. Follow the step-by-step instructions below or watch the video opposite to see how it's done:

- Grab a tape measure and measure around the girth of your dog (the deepest part of his chest) to find out how many inches or centimetres he is.
- Check out our table below to find out which size category your dog's girth measurement falls into. Should you find your dog is between sizes, opt for the size up.
- The girth measurement is in fact equal to the length of the Dogrobe – from the collar to a few inches over the hindquarters. Please check that the length of the Dogrobe in your chosen size will be long enough to cover the hindquarters. If not, please opt for the size up.

DOGROBE SIZE	DOG'S GIRTH/LENGTH MEASUREMENT	BREED EXAMPLES' GUIDELINE
MINI	16 inches/41cm	Yorkshire Terrier
TOY	20 inches/51cm	Jack Russell
XS	24 inches/61cm	Cocker Spaniel
S	26 inches/66cm	Springer Spaniel
M	30 inches/76cm	Border Collie
L	32 inches/81cm	Labrador
XL	36 inches/91cm	German Shepherd
