Enhanced Vision

How to make the Transformer Image appear on your iPad Tablet via Wifi (rev 02.14.17)

1. Note the serial number on your Transformer HD – This is important to make sure you connect to the correct Transformer via Wifi.
2. Push the Green button once on the Transformer then walk away. You will hear some clicks and the lights will turn on. If the light on the Transformer HD is flashing, this means that it is waiting for a signal.
3. Go to the “Settings” tab on your iPad. Make sure Wifi is on – Find the Transformer HD serial number – then Select it.
4. If asked to enter a password, you must enter EV_TransformerHD then click “join.” Please note this is case sensitive.
5. Make sure that the Transformer HD and the serial number you wish to use it with is check marked.
6. Then tap the Home button on the Ipad.
7. Click on the Transformer App and walk away. Be patient as the Transformer turns on. You may temporarily see the Ipad tablet camera image appear on the screen. Do not worry – this is normal.

You are now ready to use the Transformer HD!

How To Make Sure Your Transformer is Fully Off on the Ipad

1. To completely shut down the Transformer HD, make sure it is disconnected from power and press an hold the green power button for 5 seconds.
2. To close the application on your Ipad, double tap the home button and swipe the Transformer image up.
