17. In the centre below 15 & 16 square button: press to Append

18. Bottom centre rectangular button: press to Capture

Connecting and driver installation

Connect the VisionAid Keypad USB cable to your computer system. The cable is already connected to the top of the keypad; find a suitable USB socket on your computer and insert the USB connector. Take care to plug the USB connection in the correct way round. The keypad's driver will be installed automatically.

Depending on the version of Windows you are running, you may require an internet connection in order for the driver to be installed correctly.
