"bookmark", "go to beginning" announcement accordingly, for example, when you hear "page" announcement, press left or right arrow button, it is jump to previous page or jump to next page.
- ▶ During Daisy book reading, press information button once you will hear title, creator, publisher, publisher date and format announcement then continue reading. Press information button twice, time and date announcement then continue reading. Press information button third time, battery level status announcement and continue reading. Press information button forth time, WIFI connection status announcement then continue reading.
- ▶ During Daisy book reading, press bookmark button then press up or down arrow button again and again, you will hear "add bookmark", "bookmark list", "start mark highlight bookmark" announcement accordingly. for example, when you hear "add bookmark" announcement, press OK button, you will hear "bookmark x" added announcement then continue reading.

Note: When you hear "start highlight bookmark" announcement, press OK button you will hear "start mark highlight bookmark" announcement and continue reading, press bookmark button, you will hear "end mark highlight bookmark", press OK button then

play highlight bookmark repeatedly until you press bookmark button, you will hear "stop playing highlight bookmark" announcement and continue reading.

Note: During Daisy book reading, press bookmark button once, you will hear "add bookmark" announcement, press bookmark button twice, you will hear "bookmark list" announcement and press bookmark button third, you will hear "start mark highlight bookmark" announcement, it is equal to press bookmark button once then press up or down arrow button action.

- ▶ During Daisy book reading, press OK button to pause reading, you will hear "pause" announcement, press OK button again to resume reading.

E-book Reading

- ▶ Power on Evo E10, access to Main folder, press up or down arrow button again and again until you hear "E-book folder" announcement, press OK button then press up or down arrow button select E-book and you will hear book name and book file size announcement accordingly, press OK button play E-book.

Note: If there is sub folder inside E-book folder, when you hear "E-book folder" announcement, press OK button, you will hear "subfolder name" announcement, press OK button again you will hear book name and book file size announcement accordingly, press OK button play E-book.

- ▶ During E-book reading, press menu button then press up or down arrow button again and again, you will hear "go to page", "go to heading", "voice", "speed", "pitch", "background music volume", "select background music" announcement accordingly. select one option then follow below steps finish setting.

"go to page" setting: Press OK button access to it, for example, you want to go to page 15, press up or down arrow button again and again until you hear "1" announcement, press right arrow button, you will hear "10" announcement, press up or down arrow button again and again until you hear "15" announcement then press OK button go to page 15.

"go to heading" setting: Procedure the same as "go to page" setting.

"voice", "speed", "pitch", "background music volume", "select background music" setting: when you hear option announcement, for example, you hear "speed" announcement, press left or right arrow button set voice speed, press OK button save setting, you will hear "setting done" announcement then return to E-book play.

Note: 1. When you set reading speed for one E-book, it works for all other E-books.

2. When you set voice for one text book, it works for all other text books.

3. When you set pitch for one text book, it works for all other text books.

4. Only Text book has background music setting.

5. Background music volume level includes 1-9, 2-8, 3-7, 4-6, 5-5, 6-4, 7-3, 8-2.

6. Background music are preset ones marked with number 01, 02, 03, 04, 05, 06, 07, 08, 09, 10, 11, 12, 13, 14, 15, there are 15 background music in total.

7. Once background music setting done, it is valid for all other text files.

- ▶ During E-book reading, press up or down arrow button again and again, you will hear "sentence", "word", "letter", "spell" "bookmark", "go to beginning", "10%", "1%", "page" and "paragraph" announcement accordingly, for example, when you hear "page" announcement, press left or right arrow button, it is jump to previous page or jump to next page.

Note: If select bookmark navigation, press left or right arrow button, reading will jump to previous or next bookmark you once added, if you press up or right arrow button again and again, you will hear "beginning of the file" and "end file" accordingly.

- ▶ During E-book reading, press information button, you will hear E-book current page and total page announcement then continue reading. Press information button twice, time and date announcement then continue reading. Press information button third time, battery level status announcement and continue reading. Press information button fourth time, WIFI connection status announcement then continue reading.
 - ▶ During E-book reading, press bookmark button then press up or down button arrow button, you will hear "add bookmark", "bookmark list", "start mark highlight bookmark" announcement accordingly. for example, when you hear "add bookmark" announcement, press OK button, you will hear "bookmark x" added announcement then continue reading. **Note: When you hear "start highlight bookmark" announcement, press OK button you will hear "start mark highlight bookmark" announcement and continue reading, press bookmark button, you will hear "end mark highlight bookmark", press OK button then play highlight bookmark repeatedly until you press bookmark button, you will hear "stop playing highlight bookmark" announcement and continue reading.**
- Note: During E-book reading, press bookmark button once, you will hear "add bookmark" announcement, press bookmark button twice, you will hear "bookmark list" announcement and press bookmark button third time, you will hear "start mark highlight bookmark" announcement, it is equal to press bookmark button once then press up or down arrow button action.**
- ▶ During E-book reading, press OK button pause reading, you will hear "pause" announcement, press OK button again to resume reading.

Audio/Music Playing

- ▶ Power on Evo E10, access to Main folder, press up or down arrow button again and again until you hear "Music/Audio" folder announcement then press OK button then press up or down arrow button again and again select the Audio book or Music file you want to play, you will hear ""audio book or music file name" announcement, file size and file time duration announcement accordingly, press OK button to play audio book or music.
- Note: When you hear file name, file size and file time duration announcement, press menu button twice, you will hear "file management" announcement, press up or down arrow button again and again, you will hear "delete", "cut", "copy", "paste" and "sent to internal memory /SD card" announcement accordingly, for example, when you hear "delete" announcement, press OK button, you will hear "delete the file?" announcement, press OK button again, you will hear "file deleted" announcement then move to next file.**
- ▶ During Music or audio book playing, press menu button then press up or down arrow button again and again you will hear "pitch", "play mode", "equalizer" and "speed" announcement accordingly. For example, when you hear "play mode" announcement then press left or right arrow button again and again, you will hear "play mode normal", "play mode shuffle", "play mode single play", "play mode repeat one" and "play mode repeat all" announcement, select one option press OK button save setting and you will hear "setting done" announcement and continue file play.

Note: When you set each individual parameters, it works for all other music files or audio books.

- ▶ During Audio book or Music playing, press up or down arrow button, you will hear "time jump 5 seconds", "time jump 30 seconds", "time jump 1 minute", "time jump 5 minutes", "time jump 30 minutes", "time jump 1 hour", "time jump file", "time jump bookmark" and "time jump go to beginning" announcement accordingly. For example, when you hear "time jump 1 minute" announcement, press left arrow button means backward 1 minute, press right arrow button means forward 1 minute.
- ▶ During Audio book or Music playing, press and hold left or right arrow button to activate fast rewind and fast forward option.
- ▶ During Audio book or Music playing, press information button, you will hear "Audio book or Music file name" "file format", "file current time" and "" detailed information including file name, current time and total time announcement accordingly.
- ▶ During Audio book or Music playing, press OK button pause play, press OK button again to resume play.

Bookmark List and History

- ▶ No book or audio play, press bookmark button once then press left or right arrow button again and again, you will hear "all bookmark list", "E-book bookmark list", "Audio bookmark list" and "Daisy bookmark list" announcement accordingly.

For example, when you hear "E-book bookmark list" announcement, press up or down arrow button again and again quick review all books with added bookmarks, select one book, you will hear book's bookmarks quantity announcement, press OK button, you will hear book's current bookmark number and page announcement, press OK button read book.

- Note: Press bookmark button once then press menu button then press up or down arrow button again and again, you will hear "delete bookmark", "delete all bookmarks" announcement accordingly. For example, when you hear "delete bookmark" announcement", press OK button, you will hear "delete bookmark?" announcement, press OK button, you will hear "bookmark deleted" announcement.**

- ▶ No book or audio play, press bookmark button twice then press left or right arrow button again and again, you will hear "history", "E-book history," "Audio history" and "Daisy history" announcement accordingly. for example, when you hear "E-book history" announcement, press up or down arrow button, you will hear book name and page number announcement, press OK button play book.

- Note: Press bookmark button twice then press menu button then press up or down arrow button again and again, you will hear" delete history" and "delete all history" announcement accordingly, for example, when you hear "delete history" announcement, press OK button, you will hear "delete history?", press OK button again, you will hear "history deleted" announcement.**

Voice Bookmark

Ebook voice Bookmark

- ▶ At main folder, press up or down arrow button again and again until you hear "Ebook folder"

announcement, press OK button then press up or down arrow button again and again select one book, you will hear book name(if without subfolder available) announcement accordingly, press OK button access and play the book.

During book play, press bookmark button again and again until you hear "add bookmark" announcement, press and hold record button start recording your own voice bookmark, release record button stop voice bookmark recording, you will hear "voice bookmark added" announcement then continue book play.

Daisy book voice bookmark

At main folder, press up or down arrow button again and again until you hear "Daisy folder" announcement, press OK button then press up or down arrow button again and again select one book, you will hear book name(if without subfolder available) announcement accordingly, press OK button access and play the book.

During book play, press bookmark button again and again until you hear "add bookmark" announcement, press and hold record button start recording your own voice bookmark, release record button stop voice bookmark recording, you will hear "voice bookmark added" announcement then continue book play.

Note: Audio book voice bookmark adding follows the same procedure.

Voice Reminder App

- ▶ Power on Evo E10, press menu button then press up or down arrow button again and again until you hear "tools" announcement then press OK button, press up or down arrow button again and again until you hear "Voice Reminder" announcement then press OK button access to "Voice reminder".
- ▶ If you hear "no Voice Reminders" announcement, press menu button then press up or down arrow button again and again, you will hear "add voice reminder", "delete voice reminder" or "clear all Voice Reminders" announcement accordingly, when hear "add voice reminder" announcement, press OK button select "add voice reminder"
- ▶ Access to "add Voice Reminder", press up or down arrow button again and again, you will hear "once", "year", "month", "day", "hour", "minute", "press and hold record key to record" announcement accordingly, for example, to add a new voice reminder, when hear "once" announcement, press left or right arrow button again and again, you will hear "once", "every day", "every week", "every month", "every year" announcement accordingly, select "voice reminder" reminding frequency, for example, you hear "once" announcement then press up or down arrow button jump to next setting option, for example, "year" setting, when you "year" announcement, press left or right arrow button set "year" option, please follow the same procedure to set other options until you hear "press and hold record key to record" announcement then press and hold record button to add your voice reminder, press OK button, you will hear "voice reminder added" announcement.
- ▶ When voice reminder added, to review them, access to "voice reminder" app, press OK button then press up or down arrow button again and again to review voice reminder added, you will hear voice reminder detail announcement accordingly.
- ▶ When accessed to "voice reminder" and hear "voice reminder" announcement, press OK button then press menu button, press up or down arrow button again and again, you will hear "add voice

reminder", "delete voice reminder" or "clear all Voice Reminders" announcement accordingly, for example, when you hear "delete voice reminder" announcement, press OK button, you will hear "delete voice reminder?" announcement, press OK button delete selected voice reminder. Also you could follow similar procedure to "clear all voice reminders".

Voice Memo App

- ▶ Power on Evo E10, press menu button then press up or down arrow button again and again until you hear "tools" announcement then press OK button, press up or down arrow button again and again until you hear "Voice memo" announcement then press OK button access to "Voice memo", you will hear "press and hold record key to record, no voice memos" announcement.
- ▶ When hear "press and hold record key to record, no voice memos" announcement, press and hold record button to add "voice memo", you will hear "voice memo added" announcement.
- ▶ Access to "voice memo" app, you will hear "press and hold record key to record" and "added voice memo" announcement, press menu button, you will hear "delete voice memo" or "clear voice memo" announcement accordingly. For example, when you hear "delete voice memo" announcement, press OK button, you will hear "do you want to delete voice memo?" announcement, press OK button again, you will hear "voice memo has been deleted" announcement.

Note:1. You can only record 60seconds duration message as Voice Memo note.

- 2. delete voice memo means to delete voice memo you selected, clear voice memo means delete all voice memos you created**

File Management

You could choose to manage folder, single file saved at Evo E10 Daisy player.

- ▶ Power on Evo E10 then access to one folder or file
- ▶ Please press menu button twice access to file management mode then press up or down arrow button again and again, you will hear "delete", "cut", "copy", "paste", "send to internal memory/SD card" accordingly. For example, when you hear "delete" announcement, press OK button, you will hear "delete the file?" announcement, press OK button again, you will hear "file deleted" announcement.

Note: 1. File management mode designed with loop round, press up or down arrow button again and again, you may hear setting option announcement frequently.

- 2. When select file from internal memory, file can only be sent to SD card, when select file from SD card, file can only be sent to internal memory.**
- 3. When connect flash drive to Daisy player, files or folder in flash drive can only be sent to internal memory**

Talking Calculator App

- ▶ Power on Evo E10, press menu button then press up or down arrow button again and again until you hear "Tools" announcement, press OK button then press up or down arrow button again and again until you hear "calculator" announcement, press OK button access to talking calculator app.
- ▶ There are four simple mathematical application in total including plus, subtract, multiply and divide.

- ▶ Application example shown as below help you understand calculator working logic.

Example one: $20+20=40$

- Press up or down arrow button again and again until you hear "2" announcement, press OK button then press up or down arrow button again and again until hear "0" announcement then press right arrow button, you will hear "20" announcement. If you forget number "20" input, press right arrow button, you will hear "20" announcement again.
- Press menu button again and again until you hear "plus", "subtract", "multiply", "divide" and "equal to" announcement accordingly, at this case, when you hear "plus" announcement, press right arrow button, you will hear "20 plus" announcement. press right arrow button again, you will hear "20 plus" announcement again.
- Press up or down arrow button again and again until you hear "2" announcement, press OK button, press up or down arrow button again and again until you hear "0" announcement then press right arrow button, you will hear "20 plus 20" announcement, press right arrow button again, you will hear "20 plus 20" announcement again.
- Press menu button again and again until you hear "equal to" announcement then press OK button, you will hear "20 plus 20 equal to 40" announcement, press right button you will hear "20 plus 20 equal to 40" announcement again, if press OK button again, you will only hear "40" announcement. Press left arrow button means to start a new calculating task.

Example 2: $22.5+22.5=45$

- Press up or down arrow button again and again until you hear "2" announcement, press OK button then press up or down arrow button again and again until hear "2" announcement, press OK button then press up or down arrow button again and again until you hear "point" announcement, press OK button, press up or down arrow button again and again until you hear "5" announcement, press right arrow button, you will hear "22.5" announcement. If you forget number "22.5" input, press right arrow button again, you will hear "22.5" announcement again.
- Press menu button again and again until you hear "plus", "subtract", "multiply", "divide" and "equal to" announcement accordingly, at this case, when you hear "plus" announcement, press right arrow button, you will hear "22.5 plus" announcement. press right arrow button again, you will hear "22.5 plus" announcement again.
- Press up or down arrow button again and again until you hear "2" announcement, press OK button then press up or down arrow button again and again until hear "2" announcement, press OK button then press up or down arrow button again and again until you hear "point" announcement, press OK button, press up or down arrow button again and again until you hear "5" announcement, press right arrow button, you will hear "22.5 plus 22.5" announcement, press right arrow button again, you will hear "22.5 plus 22.5" announcement again.
- Press menu button again and again until you hear "equal to" announcement then press OK button, you will hear "22.5 plus 22.5 equal to 45" announcement, press right arrow button you will hear "22.5 plus 22.5 equal to 45" announcement again, if press OK button again, you will only hear "45" announcement. Press left arrow button means to start a new calculating task.

Talking Calcuagraph App(Talking Timer)

- ▶ Power on Evo E10, press menu button then press up or down arrow button again and again until you hear "Tools" announcement, press OK button then press up or down arrow button again

and again until you hear "calcuagraph" announcement, press OK button access to talking calcuagraph app, you will hear "countdown 30 minutes", "user defined 30 minutes", "inquiry", "delete data" and "remind per 15 minutes" announcement accordingly.

- ▶ when you hear "countdown 30 minutes" announcement, press OK button, you will hear "start" announcement, press any button except menu and exit button, you will hear "time passed x minutes and left x minutes" announcement. Press menu button or exit button, you will hear "cancelled, time passed x minutes" announcement, press up or down arrow button again and again until you hear "countdown 30 minutes" to start a new countdown.

Note: 1. When you hear "countdown 30 minutes" announcement, press left or right arrow button set your countdown time option, press OK button start time countdown.

2. When you hear "user define 30 minutes" announcement, press left or right arrow button, you will hear "user define xx minutes" announcement accordingly, please choose your favorite option, press OK button to start time countdown.

3. When you hear "inquiry" announcement, press OK button again and again, you will hear "x minutes totally today", "x minutes totally this month", "x minutes totally this year", "x minutes totally last year" announcement accordingly. Or press left or right arrow button, you will hear "x minutes totally today", "x minutes totally this month", "x minutes totally this year", "x minutes totally last year" announcement accordingly.

4. When you hear "delete data" announcement, press OK button, you will hear "data deleted" announcement.

5. when you hear "remind per 15 minutes" announcement, press left or right arrow button again and again, you will hear "remind per 15 minutes" or "remind per 30 minutes" announcement frequently.

Talking Compass App

- ▶ Power on Evo E10, press menu button then press up or down arrow button until you hear "Tools" announcement, press OK button then press up or down arrow button again and again until you hear "compass" announcement, press OK button then press up or down arrow button, you will hear "speak compass direction", "calibrate compass" and "restore default calibration settings" announcement accordingly. When hear "speak compass direction" press OK button get direction announcement.

Note: WE DO NOT RECOMMEND TO "calibrate compass" BY YOURSELF.

Disk Management

- ▶ Power on Evo E10, press menu button then press up or down arrow button again and again until you hear "Tools" announcement, press OK button then press up or down arrow button again and again until you hear "Disk management" announcement, press OK button then press up or down arrow button you will hear "format internal memory" and "format SD card" announcement accordingly. For example, when hear "format internal memory" press OK button you will hear "Warning! formatting will erase all data, please click up, down, left, and right to confirm" announcement.

Note: If not necessary, strongly not recommend you format internal memory, when you hear " Warning! formatting will erase all data, please click up, down, left, and right to confirm

" announcement, to get format done, you must press up arrow button, down arrow button, left arrow button and right arrow button in sequence order. Otherwise, failed to get format done.

◆ Specs and Mischievous

Item	Specs
Dimension	123*60*17mm
Weight	115gram
Battery	Built in battery
Language	English and others depend on TTS
USB protocol	USB2.0
Build in FLASH storage	4G-32G
External SD card storage	1G~32G
Operation temperature	0°C~40°C

Mischievous:

- (1) Please keep Daisy player from damping environment, high temperature and direct sun shine.
- (2) Please avoid crashing, dropping or twisting Daisy player intentionally
- (3) It is forbidden to clean Daisy player by enhanced detergent or ethy alcohol solution.

◆ Simple breakdown recover

Breakdown list	Causes	Solution
1. Can't power on or power on repeatedly	Lower battery level	Please charge battery ASAP
2. Reduce battery life	1. Battery level is low 2. Use speaker frequently 3. Access to internet all the time	1. Please charge battery ASAP 2. Please try to use earphone 3. Recommend disconnect internet when not in use
3. Button no response	Crashed	Please press and hold on On/Off button for 8sec
4. File transfer failed	USB cable disconnected	Please reconnect USB cable
5. Power off automatically	1. It is due power off time 2. Lower battery level	1. Please adjust auto power off time. 2. Please charge battery ASAP
6. No volume, volume too low or too large	Volume level is not correct	Please adjust volume level accordingly
7. Recording volume is lower	1. It is far away from mic 2. recording playback volume level is not correct	1. Please close to mic to record 2. Adjust volume level accordingly
8. Radio noise and poor effect	1. Signal is not so strong, probably far away from radio station or have interference signal around 2. No earphone connected as antenna	1. Please choose station with strong signal 2. Please connect earphone to get better effect

- Note:**
- (1) If Daisy player crashed, please press and hold power button for 10 second to reset Daisy player
 - (2) If serious problem happened, please try to upgrade software first following our instructions, if still not work, necessary to ship unit back to us for further evaluation.

Appendix A

1. Tool software creating .m3u files for internet radio and internet podcast download link page:
<https://files.secureserver.net/0sWFtaFrRvn46p>
2. How to create and save .m3u file for internet radio and podcast apps, please contact supplier for more information.
3. Internet radio app and Internet podcast app use the same .m3u file creating software.
Note: .m3u file created for internet radio app must be saved at Internet radio folder.
.m3u file created for internet podcast app must be saved at Prestored folder which inside PodcastReader folder.

Appendix B Recording file editing

During recording file play, press menu button then press up or down arrow button until hear "edit recording" announcement, press OK button access to file editing mode.

Button function changed and defined as below:

Up or Down arrow button: select navigation mode

Lef or Right arrow button: Short press, action to jump per selected navigation option

Long press, fast forward or rewind play, release button then play stop, convenient to select editing position

Record button: Launch recording

Menu button: delete selected content

Music button: Set starting point

Radio button: Set ending point

Bookmark button: cancel selection

Operation instructions:

Delete content:

When play at point A, press music button and select point A as starting point.

Continue playing until at point B, press radio button and select point B as ending point.

Press menu button, delete content from point A to point B

Insert Content:

Firstly please not select content, if selection done, press bookmark button cancel selection.

Press record button start recording, press record button again end recording, new

recording inserted to current recording file and file saved automatically and play file from editing position.

Cover content:

When play at Point A, press music button, set starting point A

Continue playing until at point B, press radio button, set ending point B

Press record button start recording, press record button again end recording, original recording from point A to point B be replaced with new recording. new recording file be saved automatically and play file from editing position.
