About VisionAid

VisionAid is a **family owned & run** business who are proud to have been supporting & providing solutions to assist partially sighted & blind people since **1996**.

We've grown to become one of the **largest low vision & blindness solution providers** in the UK. Our range of over **1,000 items** are carefully tested & selected from over **100 manufacturers** from around the world.

We pride ourselves on listening to your **specific requirements** & understand selecting the best product can seem a daunting task.

That's where our team's **175 years of combined experience**, expert advice & completely **free, no obligation in-person demonstrations** may help, wherever you are located in the UK (free demonstrations are available on most items at home, work or school).

If you have any questions, require more information, or would like to book a free in-home demonstration, please do contact us.

Pricing Information & Payment Options

Pricing - Prices shown are **excluding VAT & including carriage**. Home users purchasing for personal use will qualify for zero-rating for VAT.

Credit & Debit Cards - We're pleased to accept most major cards for purchases of any value, both **online & over the phone**.

Cheque & Cash - We're still happy to **process cheques** or accept **cash** payments.

Interest Free Credit - For most purchases **over £600** we are also pleased to partner with DivideBuy to offer

interest free credit, for up to **12 months**, subject to approval. After a quick & simple application (which includes a soft credit check), you receive an instant decision without impacting your credit score.

Our Guide to Choosing the Best Solution

On the **back cover** you'll find our **Magnification Guide** that will help determine which text size you require to read comfortably. If the **largest size is still difficult to read**, please **don't worry**. Many systems **provide much larger magnification than this** & we also have a complete range of **reading machines that will read documents out loud** & are **usable even if you have no vision**.

What are Video Magnifiers?

Electronic video magnifiers offer **significant advantages over traditional magnifying glasses** & are just as simple to use. By replacing the glass lens with camera & screen technology, they are able to **provide variable magnification, superior image quality** & a **range of enhanced high contrast viewing modes** for reading text. The **improved image clarity** also enables the magnifier to be viewed at a more **comfortable distance, improving posture & comfort**, making reading & writing **easier, faster & more enjoyable**.

Handheld Video Magnifiers

Handheld magnifiers **allow access to information wherever you are**; around the home, at the office, while shopping, in restaurants etc. They come in a variety of screen sizes from **3.5 - 13 inch**, larger screens are better suited to higher magnification levels. They all include **rechargeable batteries** & can be used whilst charging. Products are **ordered by screen size & price**.

A range of software to provide access to your PC. Magnify, read the screen out loud & output to your Braille display. All software is available as electronic download or on USB for use on multiple computers. **See website for free trials.**

● ZoomText Magnifier with SMA - from £725

Suitable for partially sighted people, ZoomText uses xFont magnification to provide clear magnification & enlarge your computer documents & apps up to 60x. It has a range of colour schemes to reduce glare & maximise comfort. In addition, a selection of highlighting features help ensure you keep sight of your mouse pointer, text cursor & other information. ZoomText also supports MS touch-screen computers.

● ZoomText Magnifier/Reader with SMA - from £950

Includes all the features of ZoomText Magnifier with the addition of speech output which reads your documents, emails, websites etc. out loud. This makes it ideal for people who either require higher levels of magnification or whose eyes tire quickly.

● ZoomText Mag & Mag/Reader USB Add-on - £120

The USB memory stick allows you to run Zoomtext on multiple computers without additional licenses. Requires administrative rights for first run.

● ZoomText Fusion with SMA - from £1,680

Combines ZoomText Magnifier (above), with its screen magnification & visual enhancements for screen viewing ease, coupled with the power & speed of JAWS for Windows® screen reading. By blending the two together, it has flexible, high quality speech, powerful keyboard access including web navigation & a range of customisable options.

● JAWS with SMA - from £995

JAWS, Job Access With Speech, is the world's most popular screen reader, developed for computer users whose vision loss prevents them from seeing screen content or navigating with a mouse. JAWS provides speech & Braille output for the most popular computer applications on your PC. You will be able to navigate the internet, write a document, read an email & create presentations from your office or home.

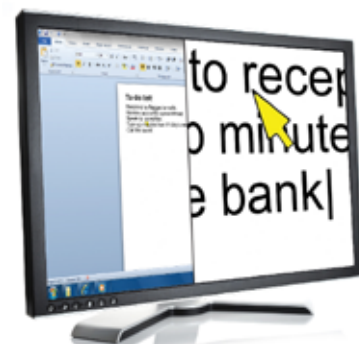

● GuideConnect - from £545

GuideConnect is a talking digital assistant that helps you manage your everyday life & have fun. Simple internet access makes it easy to find information, be entertained & stay up-to-date. It's designed by & for people with sight loss, enabling you to enlarge the text or have it read out loud. There are straightforward menus & lots of help. If you already own a Windows® laptop, desktop or have a large screened TV, add GuideConnect & get back online.

● SuperNova Magnifier - from £425

Suitable for partially sighted people, SuperNova Magnifier provides clear magnification & enlarges computer documents & apps up to 60x. It offers a range of colour schemes to reduce glare & maximise comfort while reading. In addition, a selection of highlighting features helps ensure you keep sight of your mouse pointer, text cursor & other information. SuperNova has multi-screen support & also supports MS touch-screen computers.

● SuperNova Magnifier & Speech - from £545

All the features of SuperNova Magnifier with the addition of speech output which allows you to have your documents, emails etc. read out loud. This makes it ideal for people who either require higher levels of magnification, or whose eyes may tire more quickly.

● SuperNova Magnifier & Screen Reader - from £1,135

All the features of SuperNova Magnifier with the addition of more speech output providing full screen reading capabilities & support for Braille displays. Providing full computer access for blind & partially sighted people, it is ideal for use where computers are shared e.g. universities, libraries etc.

● SuperNova Professional & Enterprise - from £1,530

- Provides all the features of SuperNova Magnifier, Magnifier & Speech & Magnifier & Screen Reader
- Single & Multi-user licencing
- SAP® Certified magnification
- MSI distribution to local networks
- **Enterprise:** Citrix Ready® for installation on local, virtual & remote devices

Light Sensitivity

Block or limit the level of natural or artificial light from a user's field of view. Assists users with light sensitivity / migraines / headaches / visual fatigue.

● Eclipse Light Shield - £159 Weighted Base - £59

Reduces the level of glare from natural light through windows or from overhead lighting - a simple and effective solution!

- Stylish, modern design that **blocks 10 - 40% more light vs other solutions**
- 1 metre maximum arm height provides **ample clearance for monitors**
- **Quick and easy** visor adjustment via single twist-lock thumb screw
- Lightweight visor mounted on a robust, steady arm
- **Fully adjustable** in both height and visor angle
- Includes desk clamp mount supporting desks up to 60mm thick
- **Options:** Weighted base

● EnChroma Lx Lens Glasses - from £187.50

- **Enhanced contrast** and **reduced glare** for users with low vision or light sensitivity, **improving comfort in bright or challenging lighting**
- Optimised colour perception through specialised Lx lens technology that helps users **distinguish visual details more easily**
- **Lightweight, everyday-wear** design suitable for indoor and outdoor use, supporting sustained visual comfort throughout the day
- A range of styles and fitover frames available

Monitor Arms

Allow screens to be positioned at the optimal height, angle & distance from your eyes, greatly improving the ergonomics for long term computer use.
