About VisionAid

VisionAid is a **family owned & run** business who are proud to have been supporting & providing solutions to assist partially sighted & blind people since **1996**.

 We've grown to become one of the **largest low vision & blindness solution providers** in the UK. Our range of over **1,000 items** are carefully tested & selected from over **100 manufacturers** from around the world.

We pride ourselves on listening to your **specific requirements** & understand selecting the best product can seem a daunting task.

 That's where our team's **175 years of combined experience**, expert advice & completely **free, no obligation in-person demonstrations** may help, wherever you are located in the UK (free demonstrations are available on most items at home, work or school).

If you have any questions, require more information, or would like to book a free in-home demonstration, please do contact us.

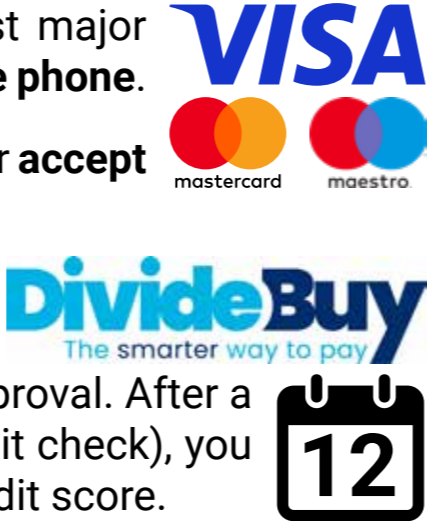

Pricing Information & Payment Options

 **Pricing** - Prices shown are **excluding VAT & including carriage**. Home users purchasing for personal use will qualify for zero-rating for VAT.

Credit & Debit Cards - We're pleased to accept most major cards for purchases of any value, both **online & over the phone**.

Cheque & Cash - We're still happy to **process cheques** or **accept cash** payments.

Interest Free Credit - For most purchases **over £600** we are also pleased to partner with DivideBuy to offer **interest free credit**, for up to **12 months**, subject to approval. After a quick & simple application (which includes a soft credit check), you receive an instant decision without impacting your credit score.

Our Guide to Choosing the Best Solution

On the **back cover** you'll find our **Magnification Guide** that will help determine which text size you require to read comfortably. If the **largest size is still difficult to read**, please **don't worry**. Many systems **provide much larger magnification than this** & we also have a complete range of **reading machines that will read documents out loud** & are **usable even if you have no vision**.

Feature Guide

The relevant icons below are shown next to each solution. Use them to quickly view and compare features between different solutions.

 Magnification Range	 External Display Connections
 Screen Size	 Touch-Screen or Touch-Screen Support
 Freeze Frame	 Image Storage or Document Storage
 Distance-Viewing or Distance Text-to-Speech	 Self-Viewing
 Enhanced Reading Colours	 On screen reading & writing guides
 Field of View (degrees of your vision filled by screen)	 Bluetooth Control or Audio
 Reads out loud	 Reading Area
 Time to Start Reading	 Start-up time
 PC Connectivity	 Compatible Operating Systems
 Footprint W x D	 Dimensions W x H x D
 Battery Life & Type	 Weight

What are Video Magnifiers?

Electronic video magnifiers offer **significant advantages over traditional magnifying glasses** and are just as simple to use. By replacing the glass lens with camera & screen technology, they are able to **provide variable magnification, superior image quality & a range of enhanced high contrast viewing modes** for reading text. The **improved image clarity** also enables the magnifier to be viewed at a more **comfortable distance, improving posture & comfort**, making reading & writing **easier, faster & more enjoyable**.

Handheld Video Magnifiers

Handheld magnifiers **allow access to information wherever you are**; around the home, at the office, while shopping, in restaurants etc. They come in a variety of screen sizes from **3.5 - 13 inch**, larger screens are better suited to higher magnification levels. They all include **rechargeable batteries** and can be used whilst charging. Products are **ordered by screen size and price**.

HandyReader HD - £149

OrCam Read Smart - £1,899 £1,790 - New software update!

Free OrCam Bluetooth earphones worth £40

The first of its kind hand held reader for people with low vision, dyslexia, reading fatigue or other difficulties

- **New: Automatic 360 degree rotation** for improved accuracy
- Just **point, click & listen!** • No internet connection required
- Converts any **printed text into clear speech within a second**
- **Simple** to use with just **4 tactile controls** • USB-C charging
- The **lightest, most portable** reading machine in the world
- 2 unique **laser targeting** modes to assist low vision users:
 1. **Pointer:** Allows you to start reading from a specific sentence in your document
 2. **Area:** Red rectangle allows framing of an area of text to read (e.g. a whole document or a paragraph in a newspaper)
- OrCam Read works on **both printed & on-screen text** (e.g. PC or laptop screen, iPad, mobile phone screen etc.)
- **Distance reading** of signs, shop names, train & airline information screens, notice boards etc. • **Table mode** (for bank statements) • **"Hey OrCam"** voice activation
- **Built-in LED** automatically assists in more challenging lighting conditions such as restaurants
- **Smart Reading** allows you to simply ask for the text that interests you, for example: "Read the headlines," "Read amounts," or "Start from" a specific section (like "desserts" in a menu)
- **Bluetooth & wired headphone** support for **privacy & increased volume**

Now includes protective case

	A4		Yes		3 secs		No		No		123 x 19 x 27 mm 4.8 x 0.7 x 1.1"
	No				No		No		3 hrs, Li-Poly		50g (1.8 oz)

- **Yellow buttons** providing **enhanced contrast**
- **Upcoming translation feature** supporting 10 languages (Wi-Fi required)
- **Document Summarisation** (Wi-Fi required) saves you time and allows you to capture a document and have **only the most important points read back to you**
- **Stand mode** allows **gesture recognition**: point at a block of text and OrCam Read 3 **detects your finger** and **starts reading from that point** in the document. Stop the reading with a halt gesture
- OrCam Stand included

A black OrCam Read 3 device is shown mounted on a black adjustable stand. The device has a camera lens and a small display screen. The stand has a base and a vertical arm that holds the device.

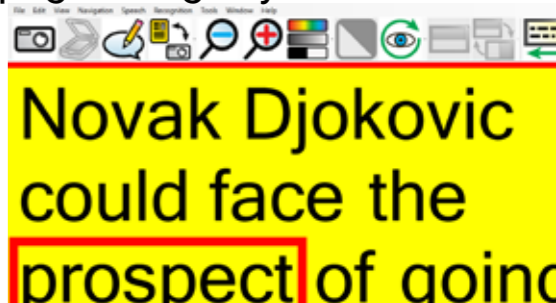

- **Real-time magnified view** of your document via your browser including **15 enhanced colour modes**
- Change between **paragraph & line views** to suit your **visual preferences**
- **Save images** to your tablet / computer
- **Copy and paste** recognised text to a document
- **Handwriting recognition** allows notes, letters, greetings & birthday cards to be read out loud
- **143 languages and 100s of voices**

A tablet is shown displaying a magnified view of a document. The text on the screen reads: "The only way to achieve the impossible is to believe it is possible". Below the text is a play button icon. To the right of the tablet is a scanner with a document being scanned.

Portable systems that connect to your PC that magnify & read documents out loud. They use your PC's screen to **display magnified invoices, books, post, magazines, cooking instructions etc.** Some units are also capable of magnifying & reading distant objects.

Visionaid

315g (11 oz)

A range of software to provide access to your PC. Magnify, read the screen out loud & output to your Braille display. All software is available as electronic download, on CD or on USB for use on multiple computers.

ZoomText Magnifier - from £500

Suitable for partially sighted people, ZoomText uses xFont magnification to provide clear magnification & enlarge your computer documents & apps up to 60x. It has a range of colour schemes to reduce glare & maximise comfort. In addition, a selection of highlighting features help ensure you keep sight of your mouse pointer, text cursor & other information. ZoomText also supports MS touch-screen computers.

ZoomText Magnifier/Reader - from £635

Includes all the features of ZoomText Magnifier with the addition of speech output which reads your documents, emails, websites etc. out loud. This makes it ideal for people who either require higher levels of magnification or whose eyes tire quickly.

ZoomText Mag & Mag/Reader USB Add-on - £130

The USB memory stick allows you to run Zoomtext on multiple computers without additional licenses. Requires administrative rights for first run.

ZoomText Fusion - from £1,335

Provides the best of both worlds – ZoomText Magnifier (above), with its screen magnification & visual enhancements for screen viewing ease, coupled with the power & speed of JAWS for Windows® screen reading. By blending the two together, it has flexible, high quality speech, powerful keyboard access including web navigation & a range of customisable options.

JAWS - from £735

JAWS, Job Access With Speech, is the world's most popular screen reader, developed for computer users whose vision loss prevents them from seeing screen content or navigating with a mouse. JAWS provides speech & Braille output for the most popular computer applications on your PC. You will be able to navigate the internet, write a document, read an email and create presentations from your office or home.

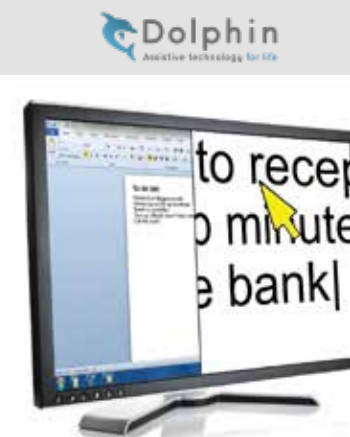

GuideConnect - from £545

GuideConnect is a talking digital assistant that helps you manage your everyday life & have fun. Simple internet access makes it easy to find information, be entertained & stay up-to-date. It's designed by & for people with sight loss, enabling you to enlarge the text or have it read out loud. There are straightforward menus & lots of help. If you already own a Windows® laptop, desktop or have a large screened TV, add GuideConnect & get back online.

SuperNova Magnifier - from £345

Suitable for partially sighted people, SuperNova Magnifier provides clear magnification & enlarges computer documents & apps up to 60x. It offers a range of colour schemes to reduce glare & maximise comfort while reading. In addition, a selection of highlighting features helps ensure you keep sight of your mouse pointer, text cursor & other information. SuperNova has multi-screen support & also supports MS touch-screen computers.

SuperNova Magnifier & Speech - from £455

All the features of SuperNova Magnifier with the addition of speech output which allows you to have your documents, emails etc. read out loud. This makes it ideal for people who either require higher levels of magnification, or whose eyes may tire more quickly.

SuperNova USB Add-on - £75

Simply plug the USB into any free USB port & experience instant access to your favourite SuperNova features, complete with your exact SuperNova settings.

SuperNova ScreenReader - from £685

Provides a fast, robust and reliable solution for accessing modern software applications. Take advantage of comprehensive support for the latest Microsoft Office packages, the newest web browsers and a huge array of other popular programs.

SuperNova Magnifier & Screen Reader - from £960

All the features of SuperNova Magnifier with the addition of more speech output providing full screen reading capabilities & support for Braille displays. Providing full computer access for blind & partially sighted people it is ideal for use where computers are shared e.g. universities, libraries etc.
