Massimiliano and Andrea Tosetto

Coniugando il know-how tecnico con il miglior design *Made in Italy*, l’azienda veneziana Lodes progetta e produce soluzioni illuminotecniche d’arredo d’interni ed esterni dal 1950.

Nata dalla passione per il vetro del fondatore Angelo Tosetto, e guidata dalla costante ricerca tecnologica, l’azienda si è trasformata in uno dei principali designer e produttori europei di illuminazione decorativa, attualmente attiva in 90 mercati nel mondo.

Oggi Lodes rappresenta un percorso evolutivo, attraverso tre generazioni, dalla pura passione alle più sorprendenti soluzioni architettoniche, grazie a sorgenti luminose in cui design contemporaneo e tecnologia di punta si integrano con materiali di altissima qualità, sapientemente sviluppati con le migliori tecniche di lavorazione. Studio Italia Design è stata selezionata come una delle aziende italiane più dinamiche secondo l’indagine “Campioni della crescita 2020”, così come nel 2021, pubblicata su “Affari & Finanza” di Repubblica.

Innovation and continued research drive Lodes’ creative process and product development. Our internal workshop allows us to go from idea to prototype in a matter of hours, and to conceive the most relevant lighting solution.

We offer *mains voltage and low voltage* driverless LED modules – efficient solutions to effectively provide the same light quality as halogen bulbs – which we design and manufacture.

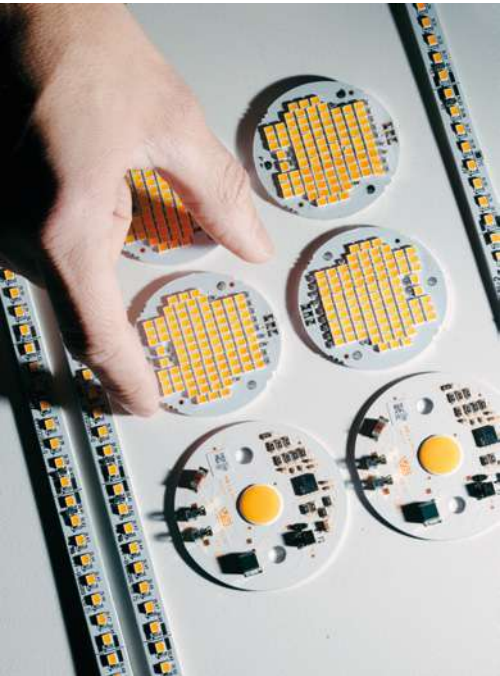

Colour Rendering Index (CRI) is the value that measures the ability of a light source to reproduce the colours of an object. All our LED light sources offer CRI 90 or higher, reflecting the natural colour of objects.

Light colour temperature is expressed in Kelvin degrees and corresponds to the hue emitted by the light source. At 2700 K or 3000 K, our LED modules deliver *warm and emotional light*. All our LED sources provide the same *quality of light colour*.

Colour variations are within the 3rd step of the MacAdam ellipse and are imperceptible to the human eye, which means that different lamps can be combined harmoniously in the same environment.

The *efficiency* of a light source is calculated by dividing the number of lumens by the number of watts (lm / W). The efficiency of our LED modules translates in energy saving.

The *long lifespan* of our LED light sources (> 80,000 hours guaranteed) saves maintenance and replacement costs compared to light bulbs. And, unlike conventional bulbs, LEDs rarely have malfunctions.

L’innovazione e la ricerca continua guidano il processo creativo e lo sviluppo dei prodotti di Lodes. L’officina interna all’azienda permette di passare velocemente dall’idea al prototipo, per concepire la soluzione di illuminazione più pertinente.

Offriamo moduli LED senza driver *a tensione di rete e a bassa tensione*, soluzioni efficienti che progettiamo e produciamo per fornire efficacemente la stessa qualità di luce delle lampadine alogene.

Il *Colour Rendering Index* (CRI) è il valore che misura la capacità di una sorgente luminosa di riprodurre i colori di un oggetto. Tutte le nostre sorgenti luminose a LED offrono CRI uguale o superiore a 90, che restituisce il colore naturale degli oggetti.

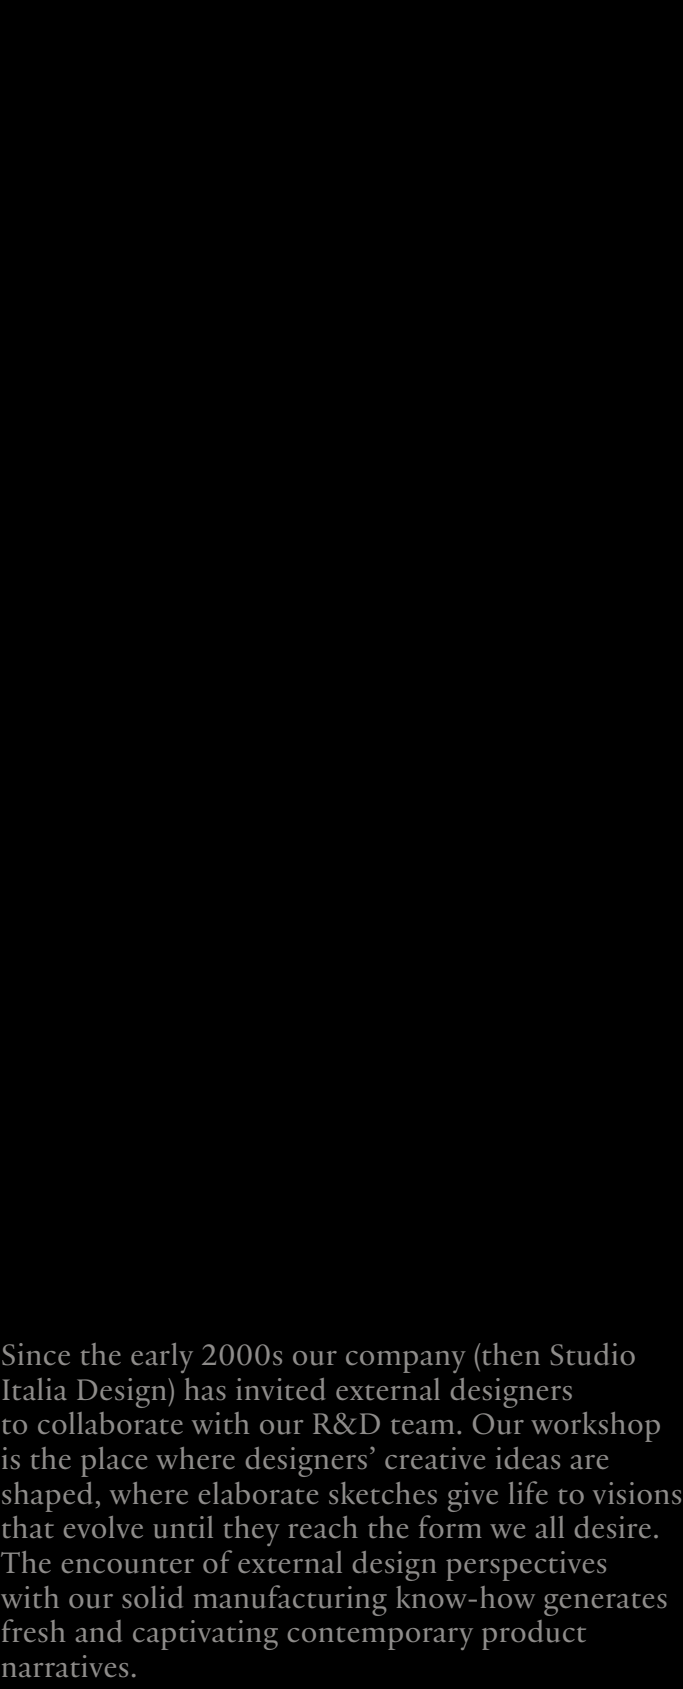

La *temperatura del colore della luce* è espressa in gradi Kelvin e corrisponde alla tonalità emessa dalla sorgente luminosa. Con 2700 K o 3000 K, i nostri LED forniscono una *luce calda ed emozionale*. Tutte le nostre sorgenti LED forniscono la stessa *qualità di colore della luce*.

Le variazioni di colore rientrano nel 3°step dell’ellisse di MacAdam e sono impercettibili all’occhio umano, il che significa che lampade diverse possono essere combinate armoniosamente nello stesso ambiente.

L’*efficienza* di una sorgente luminosa si calcola dividendo il numero di lumen per il numero di watt (lm / W). L’efficienza dei nostri moduli LED si traduce in risparmio energetico.

La *lunga durata* delle nostre sorgenti luminose a LED (>80.000 ore garantite) consente di risparmiare sui costi di manutenzione e di sostituzione rispetto alle lampadine. E, a differenza delle lampadine convenzionali, i LED raramente presentano malfunzionamenti.

Fin dai primi anni 2000 la nostra azienda (allora Studio Italia Design) ha invitato designer esterni a collaborare con il nostro team di ricerca e sviluppo. Il nostro laboratorio è il luogo dove le idee creative dei designer prendono forma, dove elaborati schizzi danno vita a visioni che si evolvono fino a raggiungere la forma desiderata. L’incontro di prospettive progettuali esterne con il nostro solido know-how produttivo genera narrazioni di prodotto contemporanee fresche e accattivanti.

Andrea Tosetto studied at the Art High School and at the Accademia delle Belle Arti in Venice. At the age of 18, he joined the company founded by his father Angelo in 1950, which he soon took over. Andrea marks the transition of the company from the classical lines of that time to an innovative and more contemporary language. His dynamic entrepreneurial style and lively creative vein come to life in refined products that enhance the craftsmanship method. Andrea succeeded in emphasising the company's know-how, focusing on the internalisation of production processes and on the use of quality materials with a strong bond with the Venetian territory. Kelly, Nautilus, Valentina are just some of Andrea's creations for Lodes.

Studio Marco Dessì is a multidisciplinary design studio based in Vienna. Thestudio's approach is practical and collaborative, where design is understood as an interactive process. Self-initiated ventures serve to experiment with materials and test processes that can be later applied onto commercial projects and/or developed further to meet the requirements of industrial or handmade replication. Commissioned design work always starts with immediate study of the client, their respective production methods and methods' inherent potentials. Dessì's studio is not committed to any particular style, preferred material or unified formula, but rather regards designing as a trade characterised by a deep understanding of materials, processes and how the two are linked. The way in which an object is produced has a direct influence over its aesthetic appearance and the story that it tells. In his work, Marco Dessì values transparency in terms of a consistent link between the process of designing and the actual conditions of production. Established in 2008, the studio works with a list of international clients and cultural institutions on a variety of scales, ranging from furniture and product design to spatial solutions.

Marco Dessì è uno studio di design multidisciplinare con sede a Vienna. Adottando un approccio pratico e collaborativo, lo studio concepisce il design come un processo interattivo. Le iniziative autonome si inseriscono in un'ottica di sperimentazione dei materiali e dei processi finalizzata alla successiva applicazione ai progetti commerciali e / o all'ulteriore sviluppo in funzione dei requisiti di produzione industriale o artigianale. I lavori commissionati non possono prescindere, in primo luogo, da un'analisi accurata del cliente, dei rispettivi metodi produttivi e delle relative potenzialità. Lo studio Dessì non si ispira ad uno stile specifico né predilige un materiale o si basa su una formula universale, bensì si dedica alla progettazione come attività caratterizzata da una profonda comprensione dei materiali, dei processi e del legame tra tali elementi. Il modo in cui un oggetto viene prodotto incide direttamente sulla sua estetica e sulla storia che racconta. Per questo, nei propri lavori Marco Dessì fa della trasparenza il nesso coerentetra il processo di progettazione e le effettive condizioni produttive. Fondato nel 2008, lo studio collabora con clienti internazionali e istituzioni culturali impegnate in settori eterogenei che spaziano dalla progettazione di arredi e prodotti alle soluzioni spaziali.

Patrick Norguet approaches objects and design from a graphical perspective. Since childhood, he has preferred sketchbooks to textbooks, filling them up with sketches and drawings. A “hands-on” approach of industry and design studies in Paris (ESDI) mark the unusual profile of this constructive rebel. His career underwent a dramatic change in 2000 when Giulio Cappellini spotted his now famous Rainbow Chair. He joined the circle of designers that matter and created his Parisian studio. Since that time, he has been designing for major producers and renowned brands. For Patrick Norguet, design is first and foremost about happy encounters. What he is most passionate about is exchanging with manufacturers, discovering their know-how; the impulse of a creative intention refined by technical constraints, economic stakes and the expectations of a user whom he hopes to discreetly but durably win over. Drawing inspiration from everything that surrounds him, Patrick Norguet does not follow trends but seeks to give shape to products whose relevance and modernity would withstand the test of time: “A well-designed object, an object created through generous collaboration is timeless.” From consumer products to luxury objects, Patrick Norguet leaves an impression of authenticity and elegance. Today, he is an essential figure on the international design scene.

Patrick Norguet si avvicina agli oggetti e al design da una prospettiva grafica. Fin dall'infanzia ha preferito i taccuini da disegno ai libri di testo, riempiendoli di schizzi e bozzetti. Un approccio “pratico” agli studi industriali e di design a Parigi (ESDI) segna il profilo insolito di questo ribelle costruttivo. La sua carriera ha subito una svolta straordinaria nel 2000, quando Giulio Cappellini ha notato la sua ormai famosa Rainbow Chair. Entra a far parte della cerchia dei designer che contano e crea il suo studio parigino. Da allora, progetta per grandi produttori e marche rinomate. Per Patrick Norguet, il design è prima di tutto sinonimo di incontri felici. Ciò che più lo appassiona è lo scambio con i produttori, la scoperta del loro know-how; l'impulso di un'intenzione creativa affinata da vincoli tecnici, da aspetti economici e dalle aspettative dell'utilizzatore che spera di conquistare in modo discreto ma duraturo. Traendo ispirazione da tutto ciò che lo circonda, Patrick Norguet non segue le tendenze, ma cerca di dare forma a prodotti la cui attualità e modernità possano resistere alla prova del tempo: “Un oggetto ben progettato, un oggetto creato grazie a una collaborazione generosa è senza tempo”. Dai prodotti di consumo agli oggetti di lusso, Patrick Norguet lascia un'impressione di autenticità ed eleganza. E oggi una figura essenziale nel panorama del design internazionale.

Very often teamwork generates winning ideas. This has been the experience for Studio Italia Design, a creative workshop that brings together different intuitions and gives shape to the ideas of the company's own people-technical and creative staff, insiders who know the sector deeply. The results of the synergy of craft, curiosity and speed, contaminated by the endless energy of Andrea Tosetto, are firmly established success stories, like the suspension lamp Sky-Fall, or the A-Tube and Puzzle collections.

A–Tube Nano

A–Tube Nano is a suspension lamp which interprets light in its simplest form by creating a thin luminous line in the living spaces. At the lower end of the lightweight aluminium structure, a transparent methacrylate diffuser houses an LED module whose light creates a soft, welcoming atmosphere. The three sizes and six statement finishes allow to create clusters of evocative lighting.

A–Tube Nano è una lampada a sospensione che interpreta la luce nella sua forma più essenziale disegnando una sottile linea luminosa nello spazio abitativo. All’estremità inferiore della leggera struttura in alluminio, un diffusore in metacrilato trasparente ospita un modulo LED la cui luce crea un’atmosfera morbida e avvolgente. Le tre dimensioni e le sei distinte finiture permettono di realizzare suggestive composizioni su cluster.

Cima

Inspired by the function of the jam cleats found in sailing boats, Cima – a nautical rope in Italian – is a “suspended” lamp characterised by a ceiling-to-floor rope, a sleek and highly functional design element. A joint that holds the lamp body slides vertically along the rope, while the counterweight allows to manage any excess rope. The simple cylindrical shapes and the black colour of these elements highlight the three brilliant finishes of the rope, vibrant accents to suit any interiors and décor mood.

Ispirata dalla funzione degli strozzascotte delle barche a vela, Cima è una lampada “sospesa” caratterizzata da una fune a tutt’altezza, elemento di design elegante e altamente funzionale. Lungo la fune scorre verticalmente un giunto che regge il corpo lampada, mentre il contrappeso permette di gestire l’eventuale fune in eccesso. Le semplici forme cilindriche e il colore nero di questi elementi risaltano le tre finiture brillanti della fune, accenti vibranti per qualsiasi ambiente e mood d’arredo.

S'inspirant de la fonction des taquets de blocage des voiliers, Cima – une corde nautique en italien – est une lampe « suspendue » caractérisée par une corde plafond-sol, élément de design élégant et fonctionnel. Le raccord qui supporte le corps de la lampe se déplace le long de la corde, tandis que le contrepoids permet d'ajuster l'excès de corde. Les formes cylindriques simples et la couleur noire de ces éléments mettent en valeur les trois finitions brillantes de la corde pour s'adapter à tous les intérieurs et à tous les styles de décoration. ●FR

Inspiriert von der Funktion der Klampen, die in Segelbooten zu finden sind, ist Cima – das bedeutet Schiffsseil auf Italienisch – eine „hängende Leuchte“, die sich durch ein Decken-Boden-Seil auszeichnet, ein elegantes und hoch funktionales Designelement. Entlang des Seils bewegt sich ein Gelenk, das den Lampenkörper stützt, während das Gegengewicht es ermöglicht, einen eventuellen Seilüberschuss zu justieren. Die schlichten Formen und die schwarze Farbe dieser Elemente unterstreichen die drei brillanten Ausführen des Seils, vibrierende Akzente, die für jedes Interieur und jede Dèkor Stimmung geeignet sind. ●DE

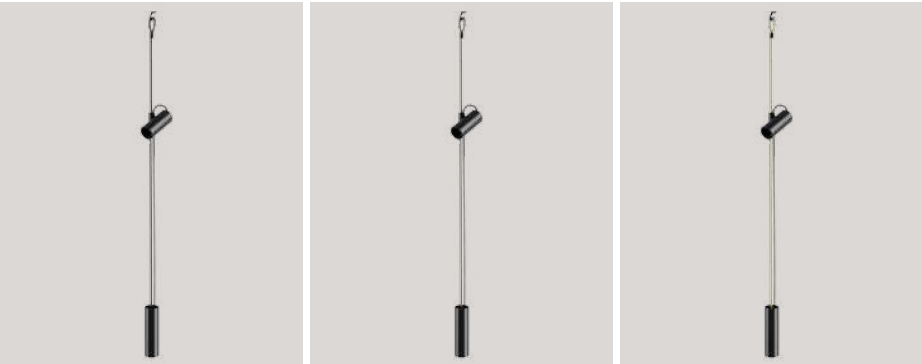

Inspirada en la función de las cornamusas que se encuentran en los veleros, Cima – una cuerda náutica en italiano – es una lámpara “suspendida” caracterizada por una cuerda que va del techo al suelo, un elemento de diseño elegante y sumamente funcional. A lo largo de la cuerda se mueve verticalmente una articulación que sujeta el cuerpo de la lámpara, mientras que el contrapeso permite reajustar cualquier exceso de cuerda. Las sencillas formas cilíndricas y el color negro de estos elementos resaltan los tres acabados brillantes de la cuerda, las notas vibrantes de cualquier interior y decoración de ambiente. ●ES

Вдохновленный функцией палубных стопоров, используемых на парусных лодках, светильник Cima – «корабельный канат» на итальянском – представляет собой подвешенную лампу, с тросом в полную высоту, задуманным как изысканный и высоко функциональный элемент дизайна. Вдоль троса вертикально перемещается шарнир, поддерживающий корпус лампы, а противовес позволяет отрегулировать избыток троса. Простые цилиндрические формы и черный цвет этих элементов подчеркивают три яркие отделки троса, вибрирующие тональности, подходящие для любых интерьеров и стилей. ●RU

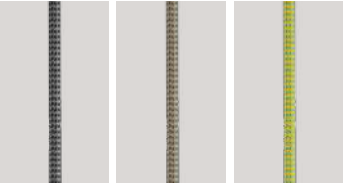

受帆船中防滑钉的功能之启发,Cima—意大利语意为航海绳—是一款特征显著的“悬浮灯”,一条全高式绳索便是其优雅且功能强大的设计元素。一块用来举持灯体的接头沿绳索垂直延伸,而配重件则可让您调节管理绳索的任何多余之处。这些元素的简约圆柱形状与黑色突出了绳索的三种光鲜饰面,令任何室内环境与装饰风尚活力四射。●ZH

Five perfect spheres floating in the air like gentle glass bubbles. Random Solo revisits the concept of the Random suspension lamp by parting the original three-piece cluster and adding two new blown glass spheres. The five sizes and six different finishes available offer ample styling freedom, both as individually suspended light points and in lightweight and lively combinations on clusters. The new fingerprint resistant frosted white finish magically changes the perception of the sphere and its volume, opening new opportunities for interior decoration.

7 Lights Rectangular Cluster

Random

A lightweight, blown glass suspension light, Random is made up of three round diffusers of different sizes which form one simple, eye-catching whole. Each diffuser has an LED light source which emits warm white light. When grouped together on a cluster, Random light fixtures form a poetic composition like soap bubbles, enhanced by the glossy coloured finishes which add a touch of character and originality.

Leggerissima lampada a sospensione in vetro soffiato, Random è composta da tre diffusori sferici di dimensioni diverse che formano un'entità semplice e vivace. Ogni diffusore è dotato di una sorgente luminosa a LED che fornisce una calda luce bianca. Raggruppate su cluster le lampade Random danno vita a composizioni poetiche come giochi di bolle di sapone, che le finiture lucide sfumate arricchiscono di carattere e originalità.

Jefferson

The Jefferson suspension lamp designed by Luca Nichetto is reminiscent of music and iconic images in psychedelic works of art from the 1960s. The vortex motif decorating the diffuser is embellished by the timeless classicism of Bohemian crystal, which diffuses evocative atmospheres of light. Dynamic in its many sizes and multiple compositions, Jefferson's elegance keeps up with the excellent performance of LED interior lighting.

La lampada a sospensione Jefferson disegnata da Luca Nichetto rimanda alla musica e alle immagini iconiche in opere d'arte psichedeliche degli anni Sessanta. Il motivo a vortice che decora il diffusore è impreziosito dalla classicità senza tempo del cristallo di Boemia, che diffonde suggestive atmosfere di luce. Dinamica nelle diverse dimensioni e in composizioni multiple, l'eleganza di Jefferson non rinuncia alle eccellenti prestazioni della luce interna a LED.

Jefferson mini, *Round Cluster System*, composition of 36 lights,
FINISH Clear + Black Chrome

La lampe à suspension Jefferson dessinée par Luca Nichetto fait référence à la musique et aux images emblématiques des œuvres d'art psychédéliques des années soixante. Le motif vortex qui orne le diffuseur est rehaussé par le classicisme intemporel du cristal de Bohême, qui diffuse des atmosphères de lumière suggestives. Dynamique dans différentes tailles et dans de multiples compositions, l'élégance de Jefferson ne renonce pas aux excellentes performances de l'éclairage intérieur LED. ● FR

Die von Luca Nichetto entworfene Hängeleuchte „Jefferson“ erinnert an die Musik und die ikonischen Darstellungen in psychedelischen Kunstwerken der sechziger Jahre. Die Wirbel-Optik des Diffusors wird aufgewertet durch den klassisch-zeitlosen Stil des böhmischen Kristalls, das suggestive Lichtstimmungen erzeugt. Erhältlich in verschiedenen Größen und vielfältigen Kompositionen, verzichtet die Eleganz von Jefferson nicht auf die hervorragende Leistung der LED-Innenbeleuchtung. ● DE

La lámpara colgante Jefferson diseñada por Luca Nichetto hace referencia a la música y a las imágenes icónicas en obras de arte psicodélicas de los años sesenta. El motivo en espiral que decora el difusor está embellecido por el estilo clásico sin tiempo del cristal de Bohemia, que difunde atmósferas sugestivas de luz. Dinámica en los diferentes tamaños y en composiciones múltiples, la elegancia de Jefferson no renuncia a las excelentes prestaciones de la luz interna de LED. ● ES

Подвесной светильник Jefferson, дизайн Лука Никетто, вызывает в памяти музыку и культовые изображения на психоделических произведениях шестидесятых годов. Ценность вихревому украшению диффузора придает вечная классика богемского хрусталя, благодаря которому создается необыкновенная световая атмосфера. Элегантная и динамичная за счет различных размеров и множественных комбинаций модель Jefferson не отказывается от превосходных характеристик внутреннего светодиодного освещения. ● RU

Luca Nichetto受上世纪六十年代迷幻视觉艺术的音乐和图案的启发设计了吊灯Jefferson。灯罩上装饰的漩涡图案因波西米亚水晶的永恒古典主义更显精美珍贵，将迷人的光线散发开来。Jefferson吊灯具有不同尺寸和多种组成的动态变化，精美雅致的同时更良好利用了内置LED灯的出色性能。● ZH

Immediate function, uncomplicated style, durable materials, modular at will. Inspired by the abat-jours of the ateliers of the early 1900s, JIM is a system of suspension lamps with distinctive shapes and a versatile composition that suits any interiors and living environment. JIM's versatility is further enhanced by the colour range: the four different finishes for the shades can be combined with the three different suspension hook hues as desired.

Immediatezza di funzione, semplicità delle linee, materiali durevoli, componibilità a piacere. Ispirato ai paralumi degli atelier di artisti dell'inizio del 1900, JIM è un sistema di lampade a sospensione dalle forme distintive e dalla composizione versatile che si adatta a qualsiasi interno e ambiente abitativo. La versatilità di JIM è ulteriormente valorizzata dalla gamma cromatica: le quattro diverse finiture disponibili per i paralumi possono essere combinate a piacere con le tre diverse tonalità del gancio a cui è sospesa la lampada.

Suspension lamp

Immédiateté de fonction, simplicité des lignes, matériaux durables, modularité en fonction des goûts personnels. S'inspirant des abat-jours des ateliers d'artistes du début du XXe siècle, JIM est un système de lampes à suspension arborant des formes distinctives et une composition polyvalente qui s'adapte à tous les styles d'habitation. La gamme chromatique souligne encore plus la polyvalence de JIM : les quatre différentes finitions disponibles pour les diffuseurs peuvent s'assortir, au choix, aux trois différentes tonalités du crochet de soutien. ● FR

Unmittelbarkeit der Funktion, Einfachheit der Linien, haltbare Materialien, Modularität nach Belieben. Inspiriert an den Lampenschirmen der Künstlerateliers der frühen 1900er Jahre, ist JIM ein Hängeleuchtensystem mit unverwechselbaren Formen und vielseitiger Gestaltungsmöglichkeit, das sich an jedes Interieur und jede Wohnumgebung anpasst. Die Vielseitigkeit von JIM wird durch die Farbpalette noch verstärkt: Die vier verschiedenen erhältlichen Ausführungen der Lampenschirme können beliebig mit den drei verschiedenen Farbtönen des Hakens, an dem die Leuchte aufgehängt wird, kombiniert werden. ● DE

Inmediatez de función, líneas sencillas, materiales duraderos y modularidad sin límites. Inspirado en las pantallas de los ateliers de artistas de principios del siglo XX, JIM es un sistema de lámparas colgantes con formas características y composición versátil que se adapta a cualquier interior y ambiente. La versatilidad de JIM la valoriza aún más la gama cromática: los cuatro acabados distintos disponibles para las pantallas se pueden combinar sin límites con los tres tonos del gancho en el que se cuelga la lámpara. ● ES

Улучшенная функциональность, простота линий, прочные материалы, модульная композиция. JIM представляет собой систему подвесных светильников, созданную в стиле абажуров ателье художников начала 1900-х годов, отличающуюся характерными формами и универсальной композицией, легко адаптирующуюся к любому интерьеру и жилищу. Универсальность применения системы JIM дополнительно повышена за счет хроматического диапазона: четыре варианта отделки абажуров комбинируются по желанию с тремя разными тональностями крюка, на котором подвешена лампа. ● RU

组拼随意的模块化与功能及时、线条简约和材料坚实之特性相邂逅。灵感源于二十世纪初期艺术家工坊中的灯罩,JIM是一种形状独特且组合多样的悬吊灯系统,适宜于任何室内装饰与家居环境。色调范围之广,使JIM的通用性越发增值:灯罩的四种不同饰面可按喜好与悬灯钩的三种不同色调相搭配。● ZH

Aile

The new Aile aluminium wall lamp features a simple and dynamic design reminiscing the aileron of sport cars, after which it has been named. Aile’s compact size, sleek design, powerful light output with respect to its dimensions and four rich finishes offer a complete lighting solution even for more intimate settings.

Aile, nuova lampada da parete in alluminio, presenta un design semplice e dinamico, proprio come l’alettone delle auto sportive, *aileron* in inglese, da cui prende il nome. La compattezza, il design elegante, la forte capacità di emissione di luce rispetto alle dimensioni e le quattro ricche finiture rendono Aile una soluzione perfetta anche per illuminare ambienti raccolti.

Puzzle Mega

Large geometric figures characterised by essential forms, which almost merge with the interior architecture when off, only to be surprisingly revealed as harmonies of light and shadow when lit. Puzzle Mega lamps decorate walls and ceiling with light.

Grandi figure geometriche dalle forme essenziali che quasi si fondono con l'architettura interna quando sono spente, per rivelare inaspettate armonie di luci e ombre una volta accese. Le lampade Puzzle Mega consentono di decorare con la luce pareti e soffitti.

Крупные геометрические фигуры с простыми строгими формами, которые почти полностью сливаются с архитектурой интерьера, когда они выключены. Но стоит их включить, как вы увидите неожиданную и гармоничную игру света и тени. Светильники Puzzle Mega позволяют декорировать светом стены и потолки. ● RU

Puzzle, Puzzle Twist

Essential forms in metal, square and rectangular, which seem to disappear in the ceiling or wall. A clear-cut geometry that plays on the effect of overlapping square shapes: thanks to its two swivel joints, Puzzle Twist can be adjusted at will to create suggestive plays of light on the walls and ceilings, making for a truly personalised atmosphere. With Puzzle lamps, light becomes the feature element of living spaces, creating soft, geometric effects.

Forme essenziali in metallo, quadrati e rettangoli che sembrano scomparire nel soffitto o nella parete. Una geometria rigorosa che gioca con un effetto di sovrapposizioni di forme quadrate: con i giunti flessibili di cui è dotata, Puzzle Twist può essere regolata a piacimento per creare suggestivi giochi di luce su pareti e soffitti rendendo l'atmosfera del tutto personale. Le lampade Puzzle rendono la luce il vero ornamento degli ambienti abitativi creando effetti di morbide geometrie.

A Single Canopies
Single canopies are ideal for highlighting the corner of a room or enhancing single light sources. They can also be used to create multiple custom combinations on high ceilings or in situations which do not allow lights to be grouped in a cluster.

B Track Systems
Track systems offers various possibilities of in-line composition with a variable number of lamps depending on the preferred type of installation, i.e. height-aligned or staggered suspensions.

C Round and Rectangular Cluster Systems
Our multiple canopies, round or rectangular, are functional systems to create suspended compositions with a variable but predefined number of holes.

D Radial Systems
Radial systems are an innovative way to separately manage various suspension cables starting from one single canopy—particularly useful to illuminate rooms with irregular ceilings.

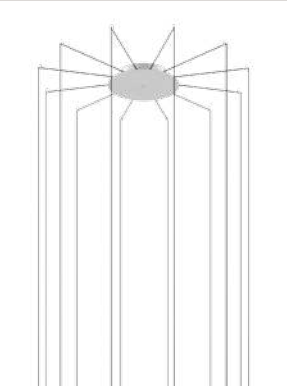

A Rosoni Singoli
I rosoni singoli si prestano ad enfatizzare gli angoli di una stanza o a valorizzare i singoli corpi luce. Possono inoltre essere utilizzati per creare composizioni multiple personalizzate su soffitti molto alti o nelle situazioni che non permettono l’utilizzo di cluster.

B Sistemi a Binario Lineare
I sistemi a binario offrono varie possibilità di composizione in linea con un numero variabile di lampade a seconda del tipo di installazione desiderato, ossia sospensioni allineate in altezza o sfalsate.

C Sistemi Cluster Rotondi e Rettangolari
I nostri rosoni multipli, rotondi o rettangolari, sono sistemi funzionali per creare composizioni sospese con un numero di fori variabile ma predefinito.

D Sistemi Radiali
I sistemi radiali sono un modo innovativo per gestire separatamente diversi cavi di sospensione a partire da un unico rosone – particolarmente utili per illuminare ambienti con soffitti irregolari.

Black

Foundational
► 1 / 4

Black is both the absence of colour and the strength that bestows depth and hues to its surroundings. At Lodes, dark nuances are tailored to the materials that don them.

The *matte black* finish clads metal lamps with confidence and sophistication. Its quintessential toughness makes it an understated solid block on which to build a personal style of décor.

Nero Antracite

Il nero è sia l’assenza di colore che la forza che conferisce profondità e sfumature all’ambiente circostante. Le tonalità scure di Lodes sono studiate a misura dei materiali che le presentano.

La finitura *nera opaca (matte black)* veste le lampade in metallo con personalità e raffinatezza. La sua intrinseca solidità la rende un tassello raffinato e discreto su cui costruire un arredamento personale.

► 2 / 4

On blown *glass*, grey filters the light like a delicate veil, while on translucent polymers it shines like a precious decorative accent suspended in the room.

The *smoke* finish enhances the precision of the blown glass and endows it with a subtle urban allure. This dark hue is enriched with a precious *glossy* treatment, becoming a refined and understated decorative accent.

In vetro soffiato filtra la luce come un velo delicato, mentre sui polimeri traslucidi il *grigio (grey)* brilla come un prezioso accento decorativo sospeso nella stanza.

La finitura *fumo (smoke)* esalta la precisione del vetro soffiato e conferisce un sottile fascino metropolitano. Questa tonalità scura si arricchisce di un prezioso trattamento *lucido (glossy)*, e diventa un accento decorativo raffinato e discreto.

White

Foundational
► 3 / 4

White has purity and creativity at its core. As opposite to black, it contains all the colours of the light spectrum. In home décor, it is a simple and balanced solution which opens up endless possibilities. Matte, frosted or shiny, coupled with any material, it is always a candid choice.

Il bianco ha al suo centro la purezza e la creatività. Al contrario del nero, contiene tutti i colori dello spettro luminoso. Nell’arredamento d’interni è una soluzione semplice ed equilibrata che apre infinite possibilità. Opaco, satinato o lucido, accoppiato a qualsiasi materiale, è sempre una scelta sincera.

Transparency celebrates the forms, softens the rigour of geometries and releases the energy of light. Transparent materials give weightlessness to the lamps and let the light decorate and animate any interior living spaces.

La trasparenza esalta le forme, ammorbidisce il rigore delle geometrie e sprigiona l’energia della luce. I materiali trasparenti conferiscono leggerezza alle lampade e lasciano alla luce il compito di arredare e animare gli ambienti di vita.
