This document is generated by computer and consequently is not signed.

The information is given in good faith and to the best of our current knowledge, and is based upon information on its components, and may be subject to change.

Furthermore, it only represents the calculated contribution of the fragrance to the CLP* labelling requirements, and does not take into account any contribution from other ingredients in the final product. The ultimate responsibility for the classification and labelling of the final product lies with the person placing it on the market. We recommend that this is determined using the information contained within the SDS of the fragrance in conjunction with that of the other ingredients in the final product.
