

AtmoSonic ULV Series 300 Fogger

Highly Portable with Wide Range of Applications

The AtmoSonic 300 Series Ultra Low Volume Fogger (ULV) is specifically used for disinfection of hospitals, care homes, laboratories, pharmaceutical industries, clean rooms, healthcare, biotech & tissue culture labs, dairies, food processing & vehicle hire.

Compact With 6.5l & 8l Capacity

A compact sized machine which works by producing small droplets of disinfecting agents at controlled pressure and uniformity to assure excellent performance. It has a smart control panel having digital screen for easy operation. The storage tank ranges from 6.5l to 8l, sufficient to cover an area of >20,000 cubic feet, eliminating the need for frequent chemical refilling.

AtmoSonic 300Series Model 4129 TGE with Turntable 360°

SPECIAL FEATURE

SS216 Grade
Flow Control Mechanism

Digital Timer
with inbuilt Hour Counter

Advance Thrust Design
Air-Jet Nozzle

Turntable
360°

Low Noise

ULV Fogger is highly appreciated for having silent operation with long service life.

It is also suitable to be used in agricultural industry for spraying variety of fungicides, pesticides, & biocides.

Use Any Chemical

It is also used for the application of biocides, fungicides, pesticides. Liquid formulations can be applied in concentrations of 2-90% and at a flow rates of 1-3 litres per hour (adjustable) using upgraded Flow Control Mechanism

Digital Timer

A digital Timer to set the fogger on for 1-99 minutes makes the entire fogging operation hassle-free. These Fogger run on a high-speed FHP motor that provides maximum thrust of spray; coupled with the advance thrust design of Air-jet nozzle, the fogger achieves fog thrust of >50 feet.

Low Maintenance

Entire body and internal parts are made of sturdy materials that resist corrosion and chemical attack & maintenance free

Unique AtmoSonic OT 360° Turntable – Leave & let it do its work!

The all new 360° Oscillating Turntable for almost 3 times the coverage. Vastly improving the performance of the 300 series Fogger, it achieves an even reach to all areas of the space, saving time & preventing condensation

AtmoSonic ULV Foggers are part the AtmoSan Decontamination System complete with AtmoSan 100% harmless biocide & AtmoSure Testing System to prove your results. Ask for more information today or visit: atmosan.co.uk
