

ENVIRONMENTAL POLICY 2019

COCO Lighting recognise the impact manufacturing & waste pose to local environments, ecology and communities. The Directors and Senior Management Team are committed to maximising the positive aspects and to reduce the negative impacts of construction projects.

COCO Lighting have implemented and maintain an environmental management system in order to define, measure and control processes and construction activities that have an effect on the environment through our operations.

To demonstrate our commitment to these aims COCO Lighting will:

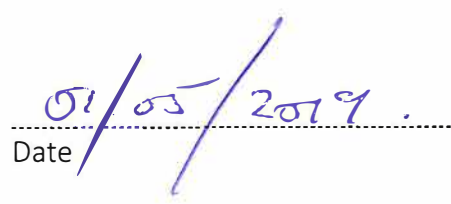

- Continually review legal requirements against COCO Lighting operations and modify our procedures in-line with best practice
- Promote COCO Lighting environmental standards throughout our supply chain and the principles of sustainable procurement and management
- Provide environmental training and awareness initiatives to ensure all personnel and supply chain partners embrace our objectives
- Work openly and collaboratively with our clients, supply chain and stakeholders to develop and provide sustainable, low carbon solutions that minimise resource usage and environmental impacts taking in to account whole life cycle costs.
- Make every effort to influence designers and clients to examine alternative sustainable products and materials
- Improve

The Directors and Senior Management Team shall ensure adequate resources are available to achieve our environmental aims and objectives. The Quality & Environmental Manager will ensure companywide compliance with this policy.

OUR OBJECTIVES

1. Reduce our carbon footprint by 15% by 2020
2. Provide IEMA workforce & management training for 100% COCO Lighting
