

**BD_SW_4B_13 Suzuki GSXR1000 - 2017 , 4 button , Up , Down , Select , Pit Speed
Left handlebar race switches for Re-flash ECU only (not KIT wiring)**

This switch is designed for use on race/track bikes fitted with a Re-flashed ECU which allows for a pit speed limiter

The aluminium assembly has been ergonomically designed for easy use and encompasses 4 momentary switches as described below.

No modification of the bike wiring is necessary, this kit plugs directly into the connectors of the standard loom. It is however necessary to wire in the pit limiter yourself to the input recommended by your re-flash provider, we simply give you 2 un-ended wires. The clutch switch wiring is also retained

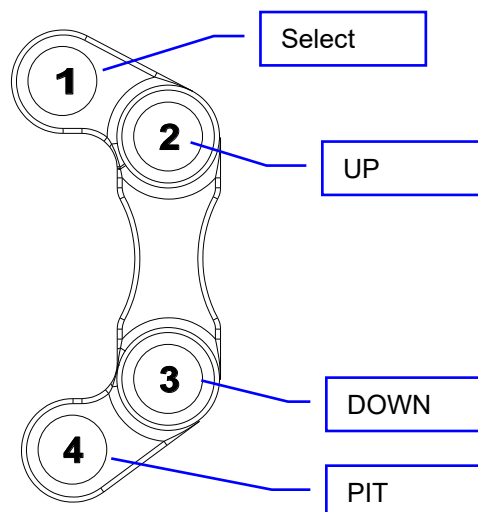

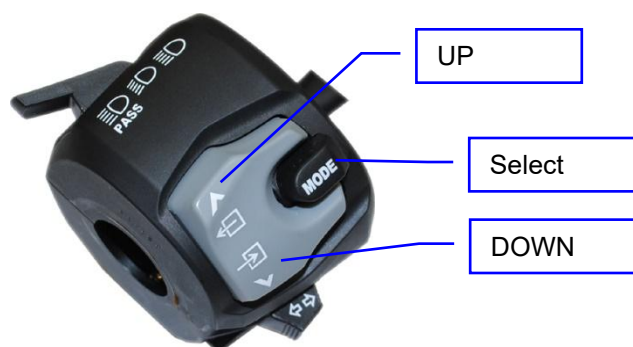

This 4 way left switch can be used with the standard right side switch or the matching 2 way race switch as seen here to the right– part number BD-SW-2B-23.

Or you can choose the BD-SW-3BXC-80 type which provides a rain light function via the stop light wiring and clamps to the stock brake pump to save space on the bars.

**Function:**

1	Green	Select
2	Black	UP function
3	Black	DOWN function
4	White	PIT Speed limit

**Electrical / Mechanical Characteristics**

Wire..... Type 55 / 24
Switch sealing..... IP67
Housing..... Aluminium

Coating..... Black anodise
Dia (handlebar)22mm (7/8")
Wire length Same as standard
