

BD_SW_5B_05 Five button handlebar race switches for

- **Ducati 1299**
- **Ducati 1098-R (2015 onwards)**
- **Ducati Superleggera**

This switch is a direct replacement for the standard left hand switch assembly found on the Ducati bikes listed above.

The set is specifically designed for track use where the turn signals and lights controls are not needed.

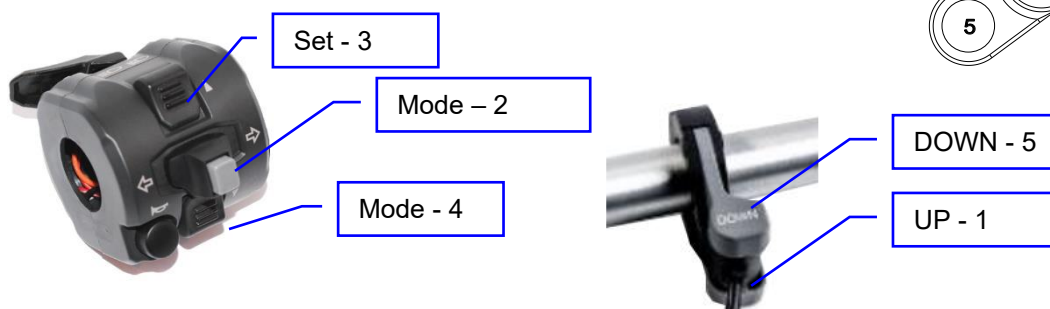

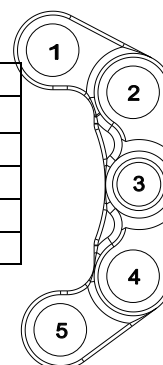

No modification of the bike wiring is necessary as this plugs directly into the 8 way and 3 way wiring loom connectors.

For customers who want to use the flasher (Lap time SET function) you will need the additional right side 3 way switch assembly BD-SW-3B-06 – Image to the right.

NOTE – The right and left side switches link together via the 2 way connector with **YELLOW** band

**Switch functions**

	Colour	Text on switch	Function
1	Green	∧	UP function originally found on the flipper switch
