

BD_SW_5B_10 Yamaha R1 2012-14 , 5 button – TCS Up/Down, Pit Speed, Map switch, Rain light. Handlebar race switch for bikes with YEC ECU and wiring

This 5 button switch is designed for use on race/track bikes with the YEC Kit ECU and wiring loom.

The aluminium assembly has been ergonomically designed for easy use and encompasses 5 switches as described below.

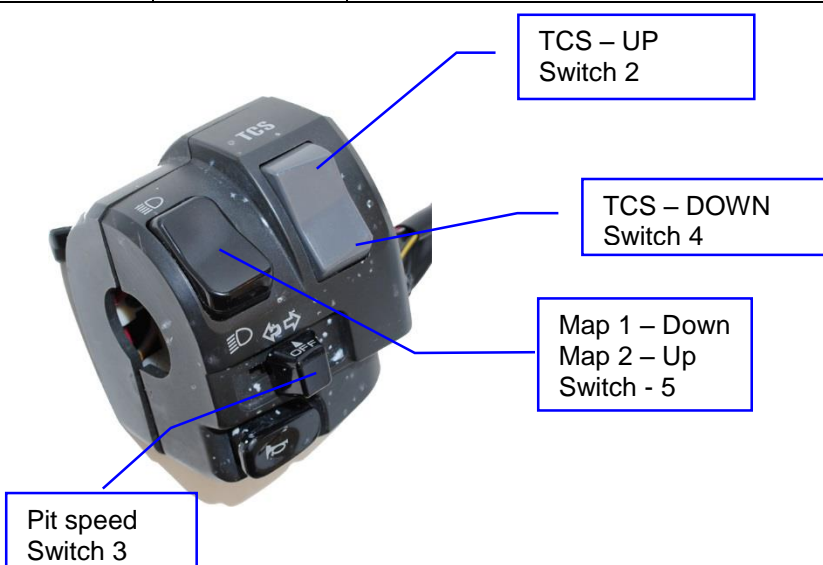

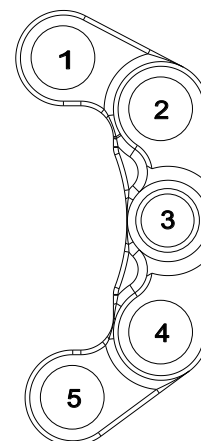

No modification of the bike wiring is necessary, this kit plugs directly into the connectors of the standard YEC wiring loom and also provides wiring for the standard clutch switch and an additional rain light.

Note that we only provide the 2 wires from the rain light switch and not the actual rain light or bike wiring for this.
