

KT190 Honda CBR1000RR (-R) Electronic Fork delete / bypass kit
CBR1000RR 2017-19
CBR1000RR-R 2020 onward, including the 2024 update

Plug in modules to replace the standard step-motors electronic forks on the Honda without a dash diagnostic warning light

Both modules are the same and can be fitted to left or right fork

Un-clip the connectors from the top triple clamp, plug in the extension cables enabling the modules to be located under the dummy tank cover. Route wiring to ensure steering movement is not restricted and cable tie in place

IMPORTANT : Turn off the ignition and wait 10 seconds before disconnecting anything. If a diagnostic is shown, switch off and wait the 10 seconds, the diagnostic is removed from the dash.

- Kit includes
- 2 x Type A-B bypass modules
 - 2 x Extension cables to suit the Honda connectors
 - 4 x cable ties

Electrical / Mechanical Characteristics

Wire..... Type 55 / 22
Switch sealing..... IP67
Housing..... PLA
Coating..... Black
