

**BD\_SW\_2B\_29****Stop/Run – Start 2 button handlebar race switch  
Triumph 675 Daytona 2006 > 2012**

This switch is a direct replacement for the standard Start / Kill switch assembly found on the Triumph 675 Daytona

This aluminium assembly has been designed ultra-slim and encompasses a red latching switch for RUN/STOP and a green momentary switch for the starter motor.

No modification of the bike wiring is necessary, this kit plugs directly into the black 6 way connector of the standard loom.

Brake switch wiring is not included for this part as it is not required on a race bike

Alternative version for 'brake clamp' mounting with integrated rain light switch
