

BD_SW_4B_17**Up – Select - Down – Pit , 4 button handlebar race****Kawasaki ZX6-RR – 2019 to 2023****For re-flashed ECU only with Pit function**

This switch is a direct replacement for the standard left switch assembly found on the ZX636 from 2019.

Designed for use on race bikes which need greater crash protection, do not need the lights, turn and horn controls, or simply need to save space on the handlebar.

The clutch wiring is included in this kit.

Rugged machined aluminium enclosure and fully sealed IP67 switches.

This switch also has one momentary switch for a pit limiter on bikes which have been re-flashed for this function. Wiring in is however necessary for the two loose wires

No modification of the bike wiring is necessary, this kit plugs directly into the connectors of the standard wiring loom for the Up/Select/Down functions

**Compatible right side switch**

BD-SW-3B_19

Stop/Run , Start , rain light

**Function:**

Green	Up	Momentary
White	Select	Momentary
Green	Up	Momentary
Blue	Pit	Momentary

Electrical / Mechanical Characteristics
