

1BX Single button universal race switch

This unique design race switch allows any of our IP67 sealed switches, in any colour to be fitted directly to the brake or clutch clamp locations.

The switches are ordered individually and can be mounted above or below using the upper /lower clamp bolts with a maximum of one per bolt (so 2 switches per side)

To optimise rider comfort each switch can be rotated up to 90deg in either direction.

Each switch can be ordered to your specification and at no extra cost:

- Switch type
 - Latching = Push to ON, then Push to OFF
 - Momentary with normally open circuit = Push
 - Momentary with normally closed circuit = Push
 - Alternate momentary with one normally closed circuit and one normally open, these reverse when pressed.
- Switch colour – red, black, white, blue, green, yellow
- Laser engraving of text up to 6 characters, eg.. ON-OFF , MAP , RAIN , TC , PIT , MODE , SELECT, START or just tell us what text you want.
- Text can also be chosen to suit mounting in the upper or lower position so the text always reads upright.

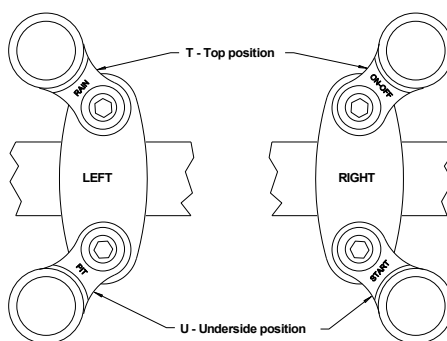

Although supplied without any connector and 600mm of 22gauge Raychem wire, we can fit almost any connector as an extra cost.

and hold to ON
and hold to OFF

Part Number builder.

1BX	Choose colour	Choose switch type	Position	Text
	R – Red	1 – Latching	T – Top	1 – ON-OFF
