

BD_SW_3BC_06**Ducati 1199R (2015 onwards) 1199 SL , 1299 , 1299 SL right side
Start , Stop/Run , lap set
3 button handlebar race switch for fitting directly onto the brake
clamp**

This switch is a direct replacement for the standard Start / Kill switch assembly found on the Panigale 1199r (after 2015) or 1299 where the user also has our left side switch, either BD-SW-5B-05 or 5BC-05

The blue SET button acts as the lap set function as originally located on the left side.

- Red , Stop/Run
- Blue , Lap set.
- Black , Starter

No modification of the bike wiring is necessary, this kit plugs directly into the connectors of the standard loom and our left side switch.

**Mounting**

These 'Type C' switches mount directly onto our own brake pump clamp(s) and are adjustable left / right to suit the rider

Three types of clamp are available

BR-A – 32mm in-line bolts (standard), switch mount locations are 13 or 22mm to the right of the pump centre line (**unless otherwise specified, this is the clamp we will supply as it fits the standard bike**)

BR-B – 30mm offset bolts to suit Brembo XR brake pump

BR-N – 32mm in-line bolts, switch mount offset of 13.5mm to the left of the pump centre line. Suits Nissin race pump

BR-F – 30mm in-line bolt pattern

Specify clamp A, B, N or F at the time of ordering. Clamps are sold separately so there is no need to replace the switch if you change your brake pump.

**IMPORTANT**

Tighten the UPPER bolt first to achieve metal to metal contact, then use the lower bolt to clamp onto the handlebar

0.5mm of gap – Used for tightening the clamp.
21.5 > 22.2mm dia bar
