

**BD_SW_3B_01 Three button handlebar race switches for
Kawasaki ZX10 – 2011 to 2015**

This switch is a direct replacement for the standard left hand switch assembly found on the ZX10

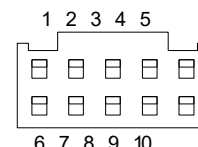

- POWER
- Pit speed limiter (kit ECU only)
- KTRC

The set is specifically designed to be used with 'kit' electronics where the turn indicator input functions as a pit speed limiter, but can be used on stock electronics knowing that this function will not work.

No modification of the bike wiring is necessary, this assembly plugs directly into the three mating loom connectors.

Connector 1 3 way triangular..... Power and Traction control modes
Connector 2 10 way block..... Pit limiter

The clutch switch wiring is supplied loose in the kit, if needed, fit to positions 3 and 8 of the 10 way connector block. View looking at the 'switch side' mating face of the connector

**Switch types**

Fill in the form below using the choices indicated, the default selections are shown in (brackets).

- **Switch type** – Momentary or latching (note – momentary is normally open circuit)
- **Switch colour** – Black / Blue / Green / Red / White / Yellow

	Colour	Text	Function
1	Black	POW	Power mode (see caution note below)
2	White	PIT	Pit speed limiter – Press and hold to activate (originally the left turn signal)
3	Black	KTRC	Traction control (see caution note below)

Notes:

- Do not press button 1 and 3 at the same time.
- Not for use on 636

**Electrical / Mechanical Characteristics**

Wire..... Type 55 / 24
Switch sealing..... IP67
Housing..... Aluminium

Coating..... Black anodise
Dia (handlebar) 22mm (7/8")
Engraving..... see data above
