

BD-SW-4B_32

Ducati V2 left side, Up – Mode – Down – Lap (flash) 4 button left side handlebar race switch

This switch is intended to replace the standard left hand handlebar switches on Ducati V2 track bikes which no longer require the light, turn and horn controls, yet still require the use of the dash MODE and Flash (lap) functions.

The aluminium assembly has been ergonomically designed for easy use and encompasses 4 momentary switches as described below.

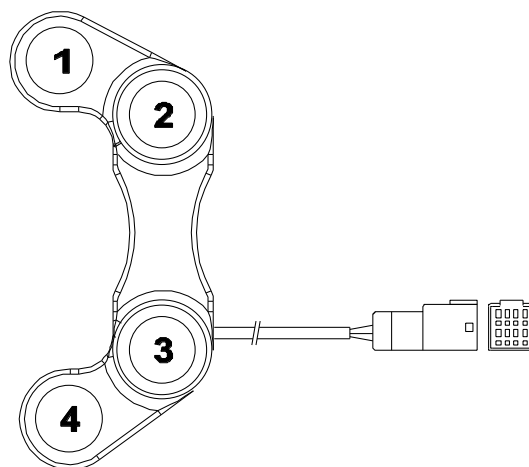

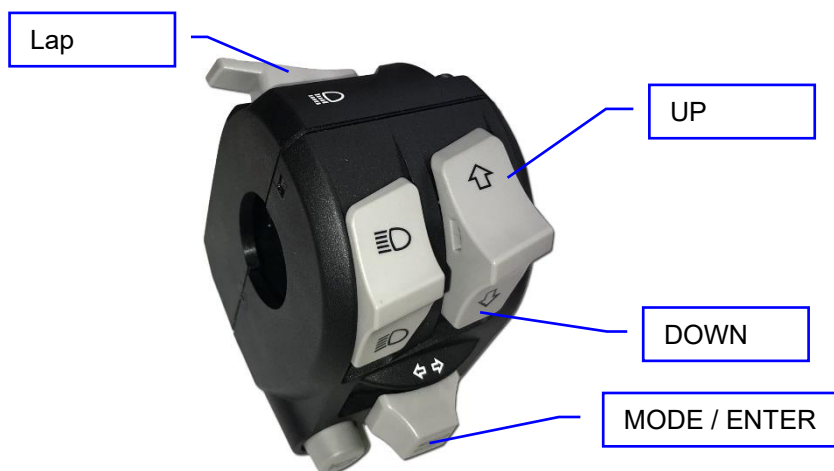

No modification of the bike wiring is necessary, this kit plugs directly into the 8 way connector of the standard loom.

We can also produce a road bike version on request with all functions enabled.

Function:

1	Green	MODE / ENTER	Momentary
2	Black	UP	Momentary
3	Black	DOWN	Momentary
4	Blue	LAP	Momentary

Matching right side switches.

BD-SW-3BC-32 (Brake mount)	BD-SW-2BC-32 (Brake mount)	BD-SW-2B-32 (bar mount)
		

Electrical / Mechanical Characteristics

Wire..... Type 55 / 24
Switch sealing..... IP67
Housing..... Aluminium

Coating..... Black anodise
Dia (handlebar) 22mm (7/8")
Wire length – Mode..... 450mm
