

BD_SW_8B_02 Eight button handlebar race switch

- **Suzuki GSXR1000RR – L7**

This switch is a direct replacement for the standard left hand multi-function switch assembly found on the latest GSXR, it features all of the standard controls needed for a road or track bike in a billet machined aluminium race style body.

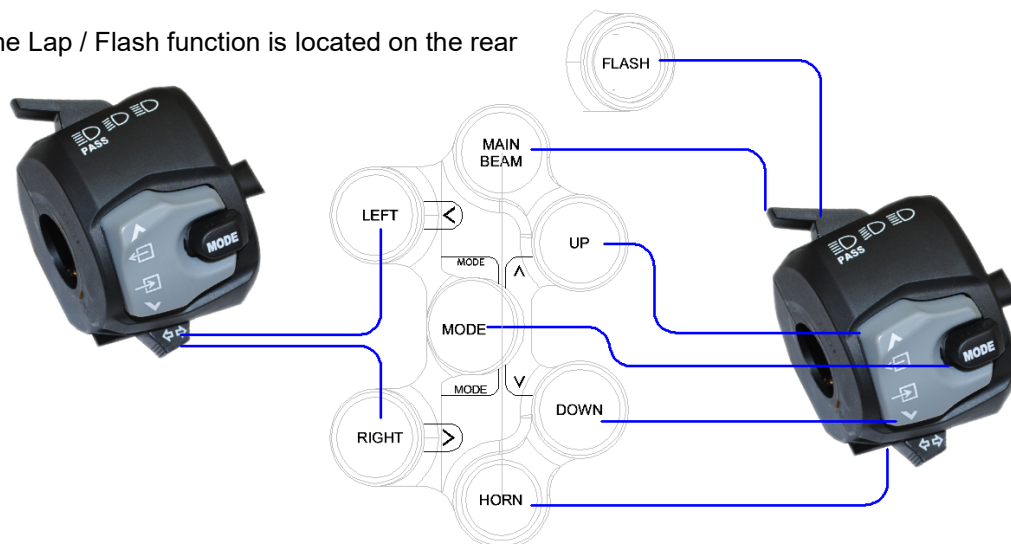

Each switch is IP67 sealed featuring gold contacts and connects to the bike via 'plug n play' connectors. So no re-wiring or bike modification is needed.

Controls are grouped ergonomically so the most important rider mode functions are close to the thumb with the headlight flash (lap set) close to your index finger at the rear.

Wiring also includes connections for the clutch switch.

Switch functions, Note - The Lap / Flash function is located on the rear

	Text on switch	Function
BLACK	↑	Dash mode UP function
BLACK	↓	Dash mode DOWN function
GREEN	MODE - Select	Dash MODE select function
BLACK (rear)	LAP / FLASH	Lap Set and Flash headlight function, duplicated on rear
YELLOW	<	Left turn signal – Push to ON, Push again to OFF
YELLOW	>	Right turn signal – Push to ON, Push again to OFF
BLUE	MAIN BEAM	Push to ON, Push again to OFF (low beam stays ON)
WHITE	HORN	Horn push to ON

Bike Sport Developments Ltd

FITTING NOTE– When installing this switch, tighten the upper M4 screw first to full tightness, This should close the upper body fully and leave no gap, then use the lower M4 screw to pinch tighten the switch on the bars. Handlebars from 22.2 down to 21.8 can be used.

Note: With this race style switch the low beam stays ON when you have selected the main beam.

For customers who want a matching right side switch
Order part number **BD-SW-2B-28**

This part also includes the brake light switch wiring.
