

BD_SW_4B_12 Kawasaki ZX10 – 2016 , 4 button right side Stop/Run, Start, Rain switch, Lap set (Launch). Handlebar race switch

This 4 way switch is designed to replace the standard right side switch block on the ZX10RR-2016 (onwards) as well as providing an additional latching switch for the rain light.

The rain light is pre-wired into the original brake light wiring circuit so control of the 'stop light' can be achieved simply by pressing the yellow button.

The aluminium assembly encompasses these waterproof switches:

- Red latching (Push On , Push OFF) for stop and run
- Yellow latching (Push On , Push OFF) for rain light
- Blue momentary to replicate the Lap time Start function
- Black momentary for engine starter

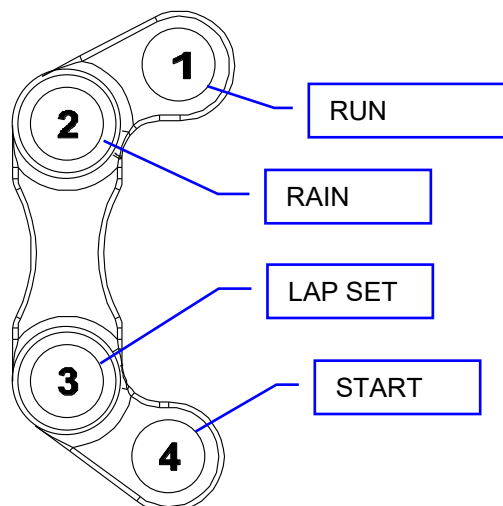

No modification of the bike wiring is necessary, this kit plugs directly into the 6 way and 2 way connectors of the standard loom,

This can be used with the standard left switch, or your choice of our 3 and 4 way race switches as seen here.

**Function:**

1	RED	Stop / Run - latching
2	YELLOW	Rain - Latching
3	BLUE	Lap set / Launch - Momentary
4	BLACK	Start - Momentary

**Electrical / Mechanical Characteristics**

Wire..... Type 55 / 24
