

BD_SW_5B_11 Yamaha R1 2015>2019 5 button right side – Stop/Run, Start, Up/Down, Select. Handlebar race switch for bikes with YEC and standard ECU

This 5 button switch is designed for use on road or race bikes being fully compatible with the standard ECU as well as YEC or re-flash versions.

Unlike other race switch products currently available that require 'selection direction changing switches' this 'micro-processor' controlled assembly has simple and intuitive Up / Select / Down push buttons to easily navigate the dash controls even with gloves on.

The whole assembly has been ergonomically designed for easy use and encompasses 5 sealed switches as described below.

No modification of the bike wiring is necessary, this kit plugs directly into the connectors of the standard loom.

Compatible left side switches

			
BD-SW-3B-09 Up Select Down	BD-SW-4B-10 Up Select Down Lap	BD-SW-5B-08 Up Select Down Pit Map	BD-SW-8B-05 Road bike
