

KT142 Ducati DES fork and shock bypass kit
V4S (including 2025 7G version)
V4 Streetfighter

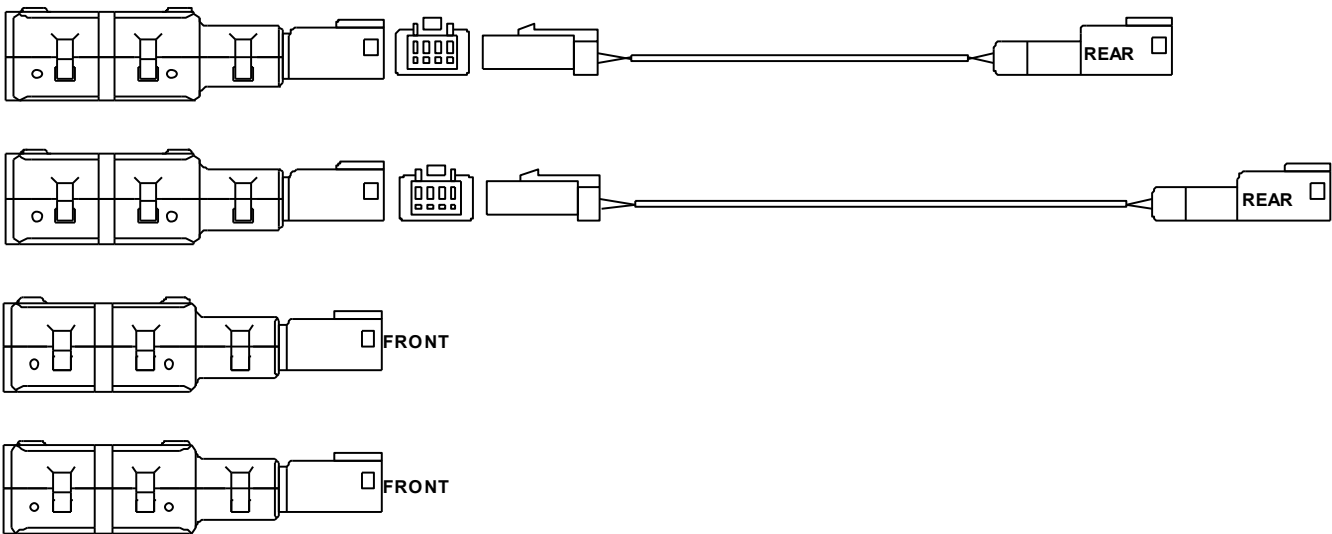

Plug in modules to replace the standard DES step-motors on the Ducati V4S, Streetfighter S

All Type **A-D** modules are the same and can be used front or rear. Extension cables are provided for the rear, enabling 2 of the modules to be located under the seat unit.

Avoiding locating in places that exceed 60deg C (so not near the engine or exhaust). No special mounting is needed

IMPORTANT : Turn off the ignition and wait 10 seconds before disconnecting anything on the bike. Failure to follow this will result in a DES diagnostic error on the dash.

- Kit includes
- 4 x Type A-D bypass modules
 - 2 x Ext cables

Electrical / Mechanical Characteristics

Wire..... Type 55 / 24 Housing PLA
Switch sealing..... IP67 Coating Black
