PRINT MORE DOCUMENTS, FASTER

Increase employee productivity by reducing time spent waiting for files to process and print. Fiery SmartRIP processes large and graphic-rich files such as Microsoft® PowerPoint® or Adobe® PDF to deliver finished prints fast. When many files are queued at the MFP, Fiery technology processes one file while printing another to minimize wait time. Built-in support of Adobe PDF and PostScript printing standards enables the highest levels of file compatibility and assures accurate printing of all files.

ACCURATE, CONSISTENT COLOR

Ideal for any business that needs to print high-quality color documents simply and quickly, the EX-c C8000 Print Server includes easy-to-use color management tools that deliver unmatched color quality from all applications and file formats.

- Print logo and corporate colors correctly
- Ensure color consistency throughout a document
- Produce high-quality photos with accurate colors, including flesh tones
- Add optional, integrated tools for color calibration, profiling, PANTONE color matching and other advanced color requirements

CREATE PROFESSIONAL, FINISHED MATERIALS QUICKLY AND EASILY

- Fiery VUE, the "visual print application," enables you to produce professional-looking print materials quickly, easily and cost effectively in-house
- Create personalized documents with free, easy-to-use variable data printing capabilities
- Easily produce jobs with mixed paper sizes and types, chapters or booklet finishing

INTEGRATE WITH STANDARD WORKFLOWS

- Integrates with many Xerox® ConnectKey® Apps to increase user productivity by simplifying and shortening everyday tasks
- Compatible with applications from third-party vendors such as Nuance, Y Soft and PaperCut

REDUCE COSTS

IT administrators can create Fiery Virtual Printers (optional) or customized printer drivers with appropriate print options for different groups of users. This enables users to print correctly, eliminating waste, with a simple File>Print operation.
