Mackworth Patient Slings

For more than 30 years Mackworth Healthcare Limited have specialised in the latest British manufacturing techniques used throughout the global moving and handling markets, resulting in an extensive, high-quality range of patient slings. Mackworth prides itself in efficiently transferring patients in the safest, most comfortable manner. As safety is at the forefront of our agenda, Mackworth use only the finest quality materials. Utilising reinforced sewing procedures, with all designs, this ensures peace of mind for carer and patient alike. Our key designs reduce shear and friction forces, whilst still providing intense strength and durability.

- 1 Highly skilled seamstresses with over 30 years experience.
- 2 Laser Guided sewing technology thus providing consistency and strength.
- 3 Computer Controlled Cutting (CNC) devices, allowing volume manufacturing.

Sling Fabric Selection

Mackworth Healthcare Limited have a variety of durable, flame retardant fabrics available to meet varying "patient specific" requirements. A selection of 100% polyester and cotton materials, ensures that there is no distortion arising from differing shrinkage in laundering, whilst complying with current fire regulations. The webbing used by Mackworth has a breaking strain of over one ton, and does not tangle or "corkscrew" during the cleaning process. All materials are repeatedly launderable up to 85 degrees, ensuring enhanced longevity.

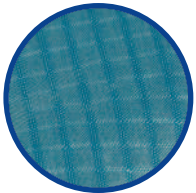

Polyester Solid (Grey)

A smooth knitted polyester fabric of a solid consistency for multi disciplinary use.

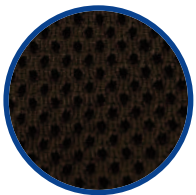

Polyester Mesh (Grey)

A versatile, breathable and durable polyester mesh.

Parasilk (Aqua Marine Blue)

A smooth, lightweight, low friction, woven polyester fabric. Ideal for wet room and bathing applications.

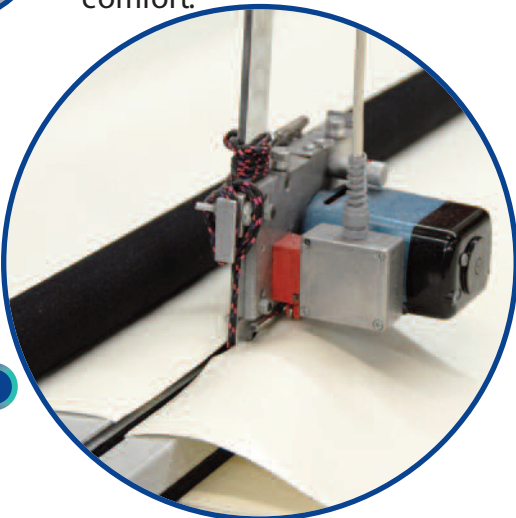

Supersoft Spacer (Black)

A "supersoft" breathable, stretch capable fabric, which is also padded for comfort during longer periods of transfer.

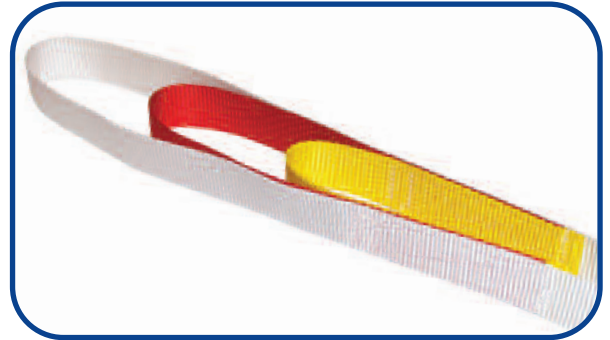

Quilted (Grey)

A padded and quilted polyester fabric which enhances patient comfort.

3

Sling Extension Pieces

A variety of extension straps are available to increase the length as required.

Dosec® Clip

The patented Dosec® Clip technology provides security and stability.

Belts

A variety of high quality belt systems and fabrics are available.

Special Features

- 1 Unique embroidered label, identifying maximum patient weight and serial number for LOLER test compliance.
- 2 Most standard sling selections are available with or without head section.
- 3 High temperature compatible, launderable labels for user guidance and traceability purposes.
- 4 Specialist pocket design enabling tidy loops & Dosec® clip housing.

Oak™

Universal Sling

Product Code Guide:

OAK/UNI/FABRIC SELECTION/SIZE REQUIRED/WITH OR WITHOUT HEAD/CLIP OR LOOP

The **Oak** sling is a widely used standard universal product made of the highest quality raw materials. As one of our best selling items within the Mackworth Healthcare range, this general purpose sling naturally comes with the usual standards expected of our specialist teams. Available with or without a shaped head section, this item can be made to individual patient requirements. **Oak** is simple to use but supportive when you need it most.

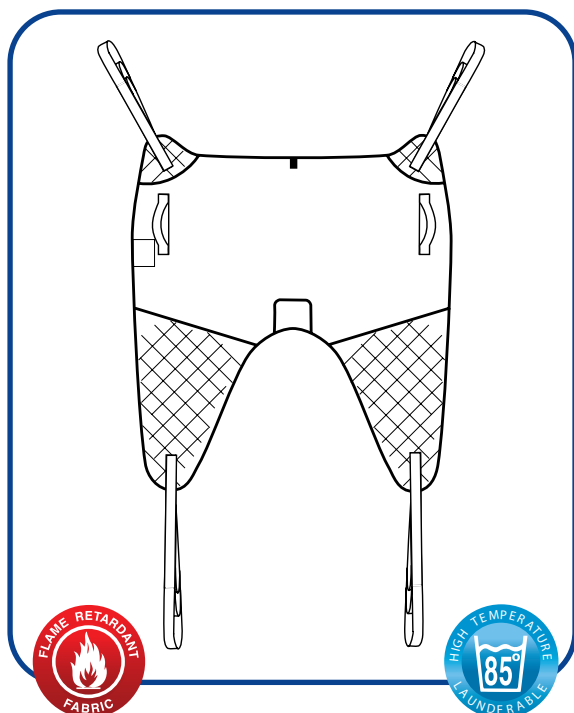

Features	Benefits
Colour coded straps or clips	Height adjustable for multi-patient application
Various fabrics available	Patient & environment specific
Webbing pocket	Allows tidy storage of webbing, when not in use
Modesty loop	Protects patient dignity
Embroidered weight & serial number label	Loler compliant - does not wash out at high temperatures

Elm™

Patient Specific Sling

Product Code Guide:

ELM/SIZE REQUIRED

The Elm sling is manufactured as an economy, disposable, single patient use product. However, as this is developed using a white sanforised, cotton, Mackworth suggest that a maximum of 20 washes at our recommended temperatures can be encouraged. This feature is highly unusual for a disposable product. When used as a multi-use, disposable patient specific sling, Elm is affordable and infection control friendly.

Hazel™

Classic Universal Sling

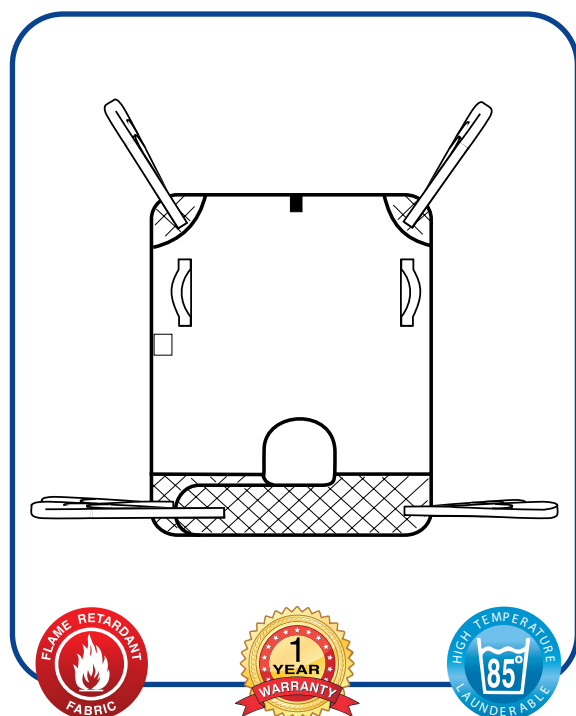

Product Code Guide:

HAZEL/FABRIC SELECTION/SIZE REQUIRED/WITH OR WITHOUT HEAD/CLIP OR LOOP

Hazel is a durable, classic universal sling pattern developed for general purpose transfers and bathing. As this product can be cut perfectly to suit each patient, stability around the body and head encourages support to those with even the most challenging disabilities. Although this item is manufactured in our grey, fade resistant colour scheme as standard, a variety of alternative, high grade materials are also available.

Features	Benefits
Colour coded straps or clips	Height adjustable for multi-patient application
A Dual sided positioning handles	Encourages ease of manoeuvrability
B Webbing pocket	Allows tidy storage of webbing, when not in use
Modesty loop	Encourages patient dignity

Pine™

Hammock Sling - Dosec®

Product Code Guide:

PINE/FABRIC SELECTION/SIZE REQUIRED/WITH OR WITHOUT HEAD/CLIP OR LOOP

Although this product is cut to provide multi-application, our alternative hammock sling, is particularly useful for amputee patients. This item can also be cut as a special product to allow toileting procedures as required. Manufactured from a variety of high grade materials and sizes to meet variable patient demographics. **Pine** is also available with a differing loop webbing selection or alternatively our ultra-strength, patented Dosec® clip. A multitude of heights can be achieved whilst ensuring transfer security throughout the complete lifting procedure.

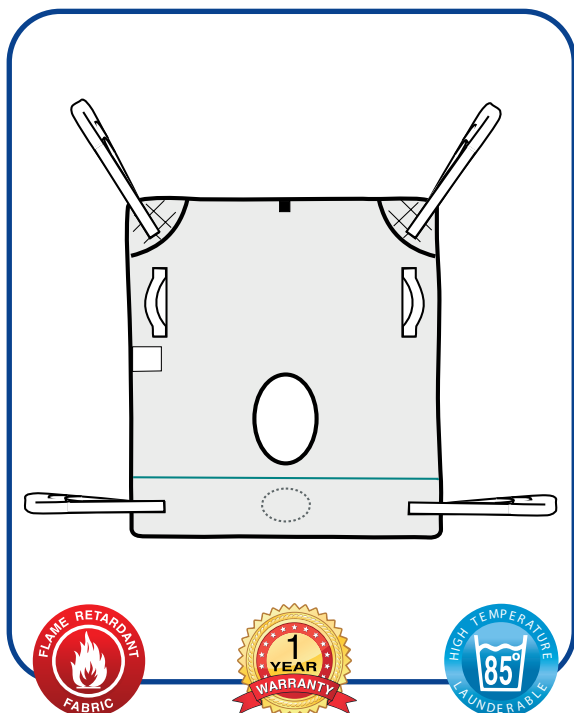

Features	Benefits
Specialist pattern design	Suitable for amputees
A Patented Dosec® clip	Provides total security and stability
B Black spacer fabric available as standard	"Supersoft", breathable and padded for complete comfort

How to fit a Handling Belt

The following pictures are provided as a guide only, in a basic numerical format of how to fit a standard or padded handling belt from a seated position. Please note that a general assessment must be conducted in all instances by a qualified carer. Mackworth Healthcare Limited does not accept any liability in relation to an incorrectly fitted handling belt.

- 1 With this product, the patient should have some upper body support. Therefore, please ask the user to lean forward and slip the belt behind the back in an upright position. Ensure that the patient is supported at all times.

- 2 Once the belt is around the waist, please loosen to the appropriate size and connect the master buckle and tighten accordingly. Do not overtighten to ensure that patient comfort is adhered to.

NB: For complete guidance on how to correctly fit all sling designs, including stand assist products, then please contact Mackworth Healthcare Ltd customer service department on our freephone number +44 (0) 800 779 7218, where somebody will be happy to assist you.

- 3 The final photograph as shown above shows how the patient handling belt should look prior to use. Please ensure that any loose webbing is tucked away in the belt loops provided.

Evergreen Supplies are proud to be a true partner of Mackworth Healthcare Limited

Mackworth Healthcare Limited are proud to have been manufacturing healthcare products in the United Kingdom, which in turn are utilised globally for a period in excess of 30 years. Whilst maintaining its core principals created from an original family business, Mackworth has invested heavily in new product development for tomorrows world of healthcare solutions.

Mackworth's products are manufactured to the highest quality control standards. These standards are maintained by only purchasing the best raw materials, whilst using computer controlled, laser guided sewing and high-frequency welding technology. A carefully controlled production process, that encompasses a zero defect policy and highly skilled operatives, ensures that Mackworth products deliver at the very highest levels of expectation.
