

MiRiCal Plus Thermal Printer & Swift Heat Press

The ultimate setup for in-house labelling of clothing and linen.

Owning a MiRiCal Plus Thermal Printer and Swift heat press gives you the endless capability to label linen and client clothing without purchasing third party software.

The MiRiCal Plus thermal transfer printer pairs best with MiRiCal's Swift heat press, recommended for the application of labels printed on the MiRiCal Plus due to its small head and base design. Labels can be easily removed using Emblem Removal Spray. All available to purchase directly from MiRiCal Emblems Ltd.
