

# Blood Plasma

| <u>Analytical Criteria</u>          | <u>Approximate Analytical Values</u>                          |
|-------------------------------------|---|
| Oil (Procedure B) %                 | 2.5   |
| Protein %                           | >73   |
| Ash %                               | <16   |
| Moisture                            | <9  |
| Insects                             | Free from insects, other pests and evidence of their presence |
| Salmonella                          | Absent  |
| Enterobacteriaceae cfu/g            | <10   |
| Smell                               | Neutral   |
| Colour                              | Off White/Beige   |
| Digestible Protein (Pepsin 0.02%) % | >85   |
| Peroxide Value mEq/kg Oil           | <10   |
| Particle Size                       | <2mm; any lumps easily broken up                              |
| Shelf Life                          | 24 months, please store in cool & dry conditions              |
| Country of Origin                   | European Union  |

\* Please note that the analytical values shown are guidelines based on wet chemistry analysis.
