

DIGI-WIFI/XA

Expanding the range once again Fast, efficient & cost-effective communication

The DIGI-WIFI/XA is a single path communicator that enables remote control of the system via the HomeControl+ App and PyronixCloud platforms, as well as InSite UDL software and Alarm Receiving Centre (ARC) connection. As the DIGI-WIFI/XA connects directly to the property's existing internet via Wi-Fi into the router, there is no need to worry about additional data usage, monthly contracts or keeping it topped up.

Benefits:

- Uses existing broadband.
- Communicates via the PyronixCloud, so no complicated port forwarding setup is required.
- Low cost installation with no additional costs other than the existing broadband connection.
- Can send push notifications directly to the user's smartphone via the HomeControl+ App.
- Easily programmed using automatic or manual settings.
- Fully secure IP connection.
- Compatible with InSite programming software.
- Requires no Ethernet cable to the cable entry point/router, so the panel does not need mounting near a phone line.
- Supplied with an antenna.
- Communicate through to the ARC using Fast Format IP, Contact ID IP and SIA 3 IP.

CSL ARC Signalling

Communicate through to the ARC using the Gemini network and the connection only service from CSL.

Partcode	DIGI-WIFI/XA
Compatibility	
Enforcer V10	✓
Euro 46 V10	✓
Antenna	✓
Technical Specifications	
Formats	Fast Format IP, Contact ID IP, SIA 3 IP Supports uploading/ downloading
Voltage	+12VDC
Quiescent	30mA
Dimensions	109 x 56 x 11mm
Certification	
Electrical conformity	CE
Environmental class	II
EN Certificate	EN50136-1: 2012 EN50136-2: 2013 CLC/ TS 50136-9: 2013
Warranty	2 years
ATS	SP5
