

The Column 30 is a 30W IP-rated indoor/outdoor column speaker with a 70v/100v transformer and an aluminium body for increased corrosion protection, producing clear sound utilising highly sensitive drivers.

Easy installation and mounting with the bracket supplied - indoor or outdoor.

The Column 30s are ideal for use in venues where good quality sound is required - these would include school and village halls, music centres, gyms, conference rooms, churches and other places of worship.
