

**TR-LITE / TR-ACTIVE and
CLIC Non Metal Range**

2024/2025

Eyewear that is both fun and practical. These exciting new frame designs offer a complete solution: the best lenses for the user in loose fitting eyewear that stays in place. The perfect match between smart eyewear and lens technology.

Available exclusively through Ellivron Optical the new TR-LITE, TR-ACTIVE and CLIC ranges have been designed and developed by frame fit experts Exeter Eyewear, creating vibrant, affordable, and accessible spectacles.

The adjustable design features of both ranges make these frames perfect for everyone with smaller faces, for all ages

Developed with myopia management, hypersensitivity, and security-of-fit all being paramount, the soft and snug fitting of the TR-LITE and TR-ACTIVE frames is enhanced by the adjustable sliders at the ear point, to fit everyone perfectly.

CLIC is a unique **no-metal range**, a regular fitting design that utilises zero metal construction, with a mould-to-shape silicone bridge and adjustable ear fittings.

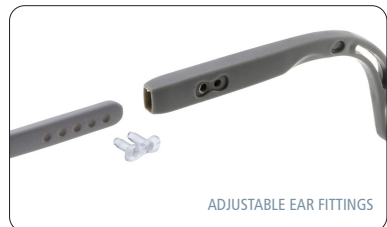

TR-LITE TR-ACTIVE

- Soft and snug fitting
- Adjustable sliders at the ear point
- Lightweight
- Myopia management, hypersensitivity
- Security-of-fit.

CLIC

- Soft and snug fitting
- Ideal for myopia management and hypersensitivity
- Security-of-fit
- Lightweight
- Zero metal construction
- Mould-to-shape silicone bridge and adjustable ear fittings.
