CARO SYSTEMS

IN PARTNERSHIP WITH

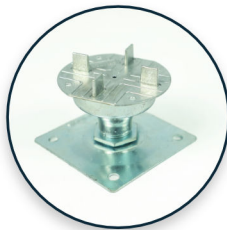

SOLIDOR

Innovative support systems for paving and decking

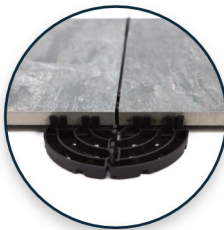

Caro Systems offers a comprehensive range of fixed-height and adjustable-height pedestals plus joist systems for efficient drainage, services access, and easy installation. As sole UK distributor for the Solidor range, Caro Systems provides solutions from ultra-low 10mm pedestals to fully adjustable systems reaching 1000mm high. We also offer the Structusol aluminium joist system for stable foundations with large-format tiles.

on the market

CARO FDS

Flood Defence Systems

Robust, reusable barrier systems designed to protect properties from flood damage. Easy to deploy, reliable in performance, and built for environmental durability.

Industry-leading accreditation

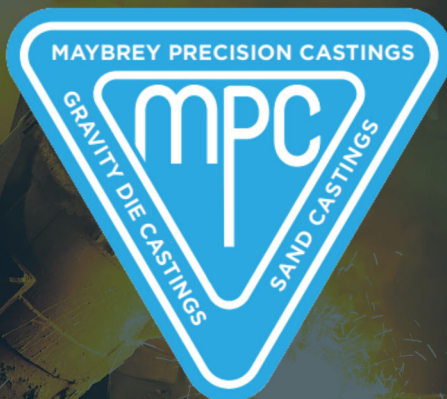

Caro is the first company in the UK to achieve third-party approval to BS 851188-1:2019+A1:2021 for demountable barriers – authorised to supply the Environment Agency's PFR Framework. Designed and manufactured to order by Caro, a carbon-negative UK manufacturer, at our Kent facility.

Certified and compliant

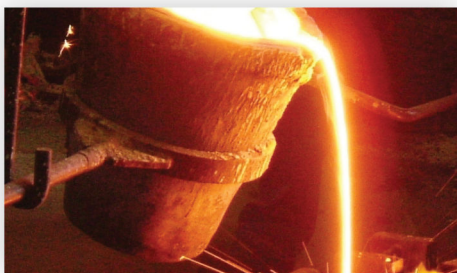

**BS 851188-1:2019+A1:2021
ISO 9001:2015**

Maybrey Precision Castings

A cornerstone of the Caro Group since 1839, Maybrey is internationally recognised for sand casting, gravity die casting, and heavy machining. Based in Kent, it fuses traditional craftsmanship with cutting-edge techniques – including 3D-printed sand moulds – to serve industries from defence and automotive to architecture and art.

Foundry Standards Compliant

AS9100 Accredited

Engineered For Performance, Built For The Planet

The Caro Group is a UK leader in precision engineering and sustainable manufacturing. With a heritage dating back to 1839, Caro combines deep-rooted craftsmanship with future-focused innovation across construction, water management, and advanced casting.

Carbon-negative manufacturing Future Net Zero Gold certified

Major investment in clean production, responsible sourcing, and waste reduction means every Caro product actively contributes to a greener future.
